

APSE ranked first in framework

APSE is proud to have been ranked first following the evaluation of a framework for consultancy by a member authority. Renfrewshire Council has established a Framework Agreement with a number of suitably qualified Contractors for the provision of Systems Thinking Consultancy Services. According to the specification, typically consultancy services will be required by the Council's Housing Services Department and tenderers were required to provide evidence of specific Systems Thinking expertise in this area.

It is anticipated that contracts awarded under the Framework Agreement will be allocated either by direct call off or through a mini competition exercise. In direct call off - tenders will be ranked based on the award criteria as contained within the Bid Selection & Award Criteria section of the tender document. The highest scoring tenderer will be ranked in 1st position; the second highest tenderer will be ranked in 2nd position and so on. Where a requirement arises, the Contract will be offered to APSE as the Contractor ranked as 1st.
