Winter Resilience Review – Final Report Recommendations

Recommendations

Greater efficiencies in salt utilisation

Guidance available – appropriate and effective levels

No overspreading

Conserving stocks

Reducing costs

Local decision

Recommendations

Increased stock holding

Recommended level over medium term of 12 days / 48 runs

Most councils currently re-stocking at higher levels than last year

Wide variation in stocks – lowest in South East
Collaboration promoted

Interim report - HA to buy 0.25m tonnes from abroad; premium cost to encourage planning by other users; final reserve stock in emergencies

Recommendations

Regular monitoring

Stocks already monitored

Expected to establish a comprehensive monitoring system

Intention is to avoid activating the Salt Cell
