

UNFCCC COP26

What Happens Now?

Founded in 2000

Cutting edge, interdisciplinary, policy focused research on:

- Emissions reduction from energy
- Climate impacts, risks, and adaptation
- Public perceptions of climate change
- Governance of climate negotiations and policymaking

@tyndallmanc

Tyndall°Centre 21 years
for Climate Change Research

COP26

- Incremental, as ever...
- Growing effort on methane
- Loss and damage
- Deforestation?
- Discourses of delay
- Bi-lateral agreements

Beyond COP26

Future Research Goals

- Technology Development
 - Sustainable aviation fuels
 - Decarbonising shipping
 - Carbon Capture and Storage
- Accelerating Social Transformations
 - Changes in consumption
 - Decision making tools
 - Organisational change and local action
 - New business models (e.g. circular economy models)
- Living With Environmental Change
 - Risk assessment and resilience

Centre for **Climate Change**
and **Social Transformations**

Thank you
