

APSE Energy

APSE Energy supports councils in developing sustainable energy solutions and responding to climate challenges. It is designed to bring councils together to share information, ideas, resources, best practice, and to support local energy projects. Working together enables them to exchange knowledge on funding sources and options, law and procurement. It also helps them to gain greater marketplace leverage.

Through collaboration and shared expertise, we provide:

- Advice on renewable energy and efficiency
- Technical, legal, and procurement support
- Workshops, research, and policy updates
- Networking and knowledge exchange

Meet our Head of Service

Phil Brennan
Head of APSE Energy

Phil Brennan is the Head of APSE Energy and is responsible for all membership and consultancy work undertaken for APSE Energy members. Prior to this post, he was Principal Advisor responsible for work on building maintenance, housing, highways, street lighting and winter maintenance and managed the renewables and climate change advisory group as well as members and work in Northern Ireland.

Before working with APSE he was with Preston City Council working on the implementation of Best Value, performance management and corporate policy development.
