# Scotland Fleet, Waste & Grounds Seminar 2025

**Tuesday 20 May – Friday 23 May 2025**

**MacDonald Aviemore Highland Resort**

Brochure Sponsor:

# Programme: Wednesday 21 May

09.45 – 10:30: Scotland's largest public sector fleet, waste and ground services exhibition opens.

Registration and exhibition viewing and refreshments.

Sponsored by Steril Koni Ltd

## 10.30 – 12.00: Session One: Keynote session – Waste and Recycling services and the road ahead

### Waste and Recycling – State of the market

- Setting the local government scene
- Key findings from the survey
- Future focus

**Speaker:** Mo Baines, Chief Executive, APSE

### Buildings tomorrow's recycling: Co-designing sustainable household solutions

*This will be a joint session providing Scottish and Local Government Perspectives*

- Setting the scene
- Methodology for the co-design process
- Next steps

**Speakers:** Hollie Whitfield, Senior Policy Manager – Recycling, Scottish Government and Charlie Devine, Service Manager – Waste Partnership, Dundee City Council

## 10.45 – 12.00: Parks, Streets & Grounds discussion forum

To debate the latest challenges and opportunities for the sector including grasslands management and biodiversity

12.00 – 13.15: Lunch, refreshments and exhibition viewing

Sponsored by Steril Koni Ltd

## 13.15 – 14.30 Session Two: Strategies for improving street cleansing operations and litter reduction

### Driving toward a cleaner future: Roadside litter – where do we go from here?

- The national data and evidence from audits and public polling on roadside litter
- Our approach to campaigning, key learning after a recent review of previous campaign design and messaging with partners and the public
- Outcomes from a recent intervention delivered along the A9 with Perth and Kinross Council
- Our commitments and call to the government, partners and the public

**Speaker:** Heather McLaughlin, Campaigns and Social Innovation Manager, Keep Scotland Beautiful

### Digital tools for cleaner streets: A council approach to tackling flytipping with technology

- The importance of technology in the fight against flytipping
- Examples in action
- Future areas of focus

**Speaker:** Paul Mallis, Strategy Support Officer – NETs, Land & Countryside Service, West Lothian Council

14.30 – 15.00 – Exhibition viewing and refreshments

Sponsored by Steril Koni Ltd

## 15.00 – 16.15 Session Three: Keynote session – Transport responsibilities and compliance

### Keynote address: Responsibilities of fleet managers and latest issues

**Speaker:** Victoria Davies, Traffic Commissioner for Wales

### DVSA and Enforcement Update

- Vehicle testing and enforcement
- Service developments including IT
- Direction of travel and any areas of concern

**Speaker:** Gordon Thomson, Head of Vehicle Testing and Approvals Service/Policy, Driver and Vehicle Standards

### Maintaining roadworthiness and guidance updates

- Guide to maintaining roadworthiness
- MOT future standards
- Brake testing
- Any additional legal compliance/ workshop issues

**Speaker:** Phil Lloyd, Head of Engineering Policy, Logistics UK

15.00 – 16.15: Litter Manager Network discussion forum – a discussion on Scotland's National Litter and Fly tipping strategy focusing on the progression of actions with representation from the Strategic Delivery Partners

16.15 – 17.00: Event welcome reception – bottom of external car park

Sponsored by Aviemore MacDonald Highland Resort

18.30 – 20.30: Gala Buffet dinner (for all seminar attendees)

Sponsored by Dennis Eagle UK and Terberg Matec UK

# Programme: Thursday 22 May

09.15 – 10.00: Exhibition viewing and refreshments

10.00 – 11.15: **Session Four: Greening the future – Climate-smart strategies for parks, grounds and open spaces**

## **Riverwoods: Realising a network of resilient river woodland systems throughout Scotland**

- Benefits of river woodlands for nature and the climate
- Overview of the blueprint project including the use of AI
- Resources and opportunities

**Speaker:** Nicole Still, Riverwoods Project Manager, Scottish Wildlife Trust

## **Allotments duties under Part 9 of the Community Empowerment (Scotland) Act 2015**

- Key issues effecting local authorities across Scotland
- Good practice from both urban and rural communities
- Reporting purpose and pressures

**Speaker:** Fiona Sutton-Wilson, Head of APSE Training, APSE

## 10.00 – 11.15: **Transport advisory discussion forum**

This session will include the fleet decarbonisation and Public Sector Action Plan with representation from Transport Scotland and Energy Savings Trust

Sponsored by Enterprise

11.15 – 11.45: Exhibition viewing and refreshments

## 11.45 – 13.00: **Session Five: Navigating drug and alcohol policy – including understanding testing regimes and their impact**

Sponsored by JCB

## **Local authority case study scenarios**

- Complexity of the landscape
- Case study examples
- Where to next?

**Speaker:** Louise Melville, Principal Advisor, APSE

## **Drive safe, stay safe: The important of a Drug and Alcohol policy**

- Why do we need a policy?
- What does our policy involve?
- Driver wellbeing and safe operations

**Speaker:** Representative, William Hamilton & Sons and APSE Approved Partner

## **Enhancing workplace safety through robust drug and alcohol policy: Best practices and testing solutions**

- Benefits of a robust drug and alcohol policy

- Drug testing solutions available
- Fingerprint drug testing technology and how it works

**Speaker:** Josh Klein-Davies, National Account Manager and Terry Elvin, Head of UK Sales, Intelligent Fingerprinting

## 11.45 – 13.00: **Waste discussion forum**

To debate the latest challenges and opportunities for the sector. This will continue the discussion on the circular Economy and Waste Route Map for 2030, with attendees sharing information and experiences on meeting the important policy milestones.

13.00 – 14.15: Lunch and exhibition viewing  
Sponsored by DAF Trucks Limited

## 14.15 – 15.30: **Session Six: Waste and Recycling services and the road ahead (Part 2)**

### **A UK perspective on future waste challenges**

- Future waste compositions
- Progress at the top of the hierarchy
- Planning for change

**Speaker:** Louise Cowan, Strategy Director - Climate, Local Partnerships

### **Tackling overconsumption: A path to reducing waste and building a sustainable future**

- The importance of tackling overconsumption
- Supporting local authorities and others to help encourage reduced consumption
- Future planning

**Speaker:** Donna Rigby, Recycling Partner, Zero Waste Scotland

### **Extension of emissions trading scheme to include thermal waste treatment**

- What is ETS and why waste?
- What is the impact?
- What do we need to do?

**Speaker:** David Robertson, APSE Associate

15.30 – 16.00: External exhibition viewing and refreshments

## 19.00 – 19.30: **Pre-dinner evening reception** Sponsored by Whale Tankers

19.30: Charity dinner (Smart suit or equivalent)  
Sponsored by FAUN-Zoeller (UK) Limited

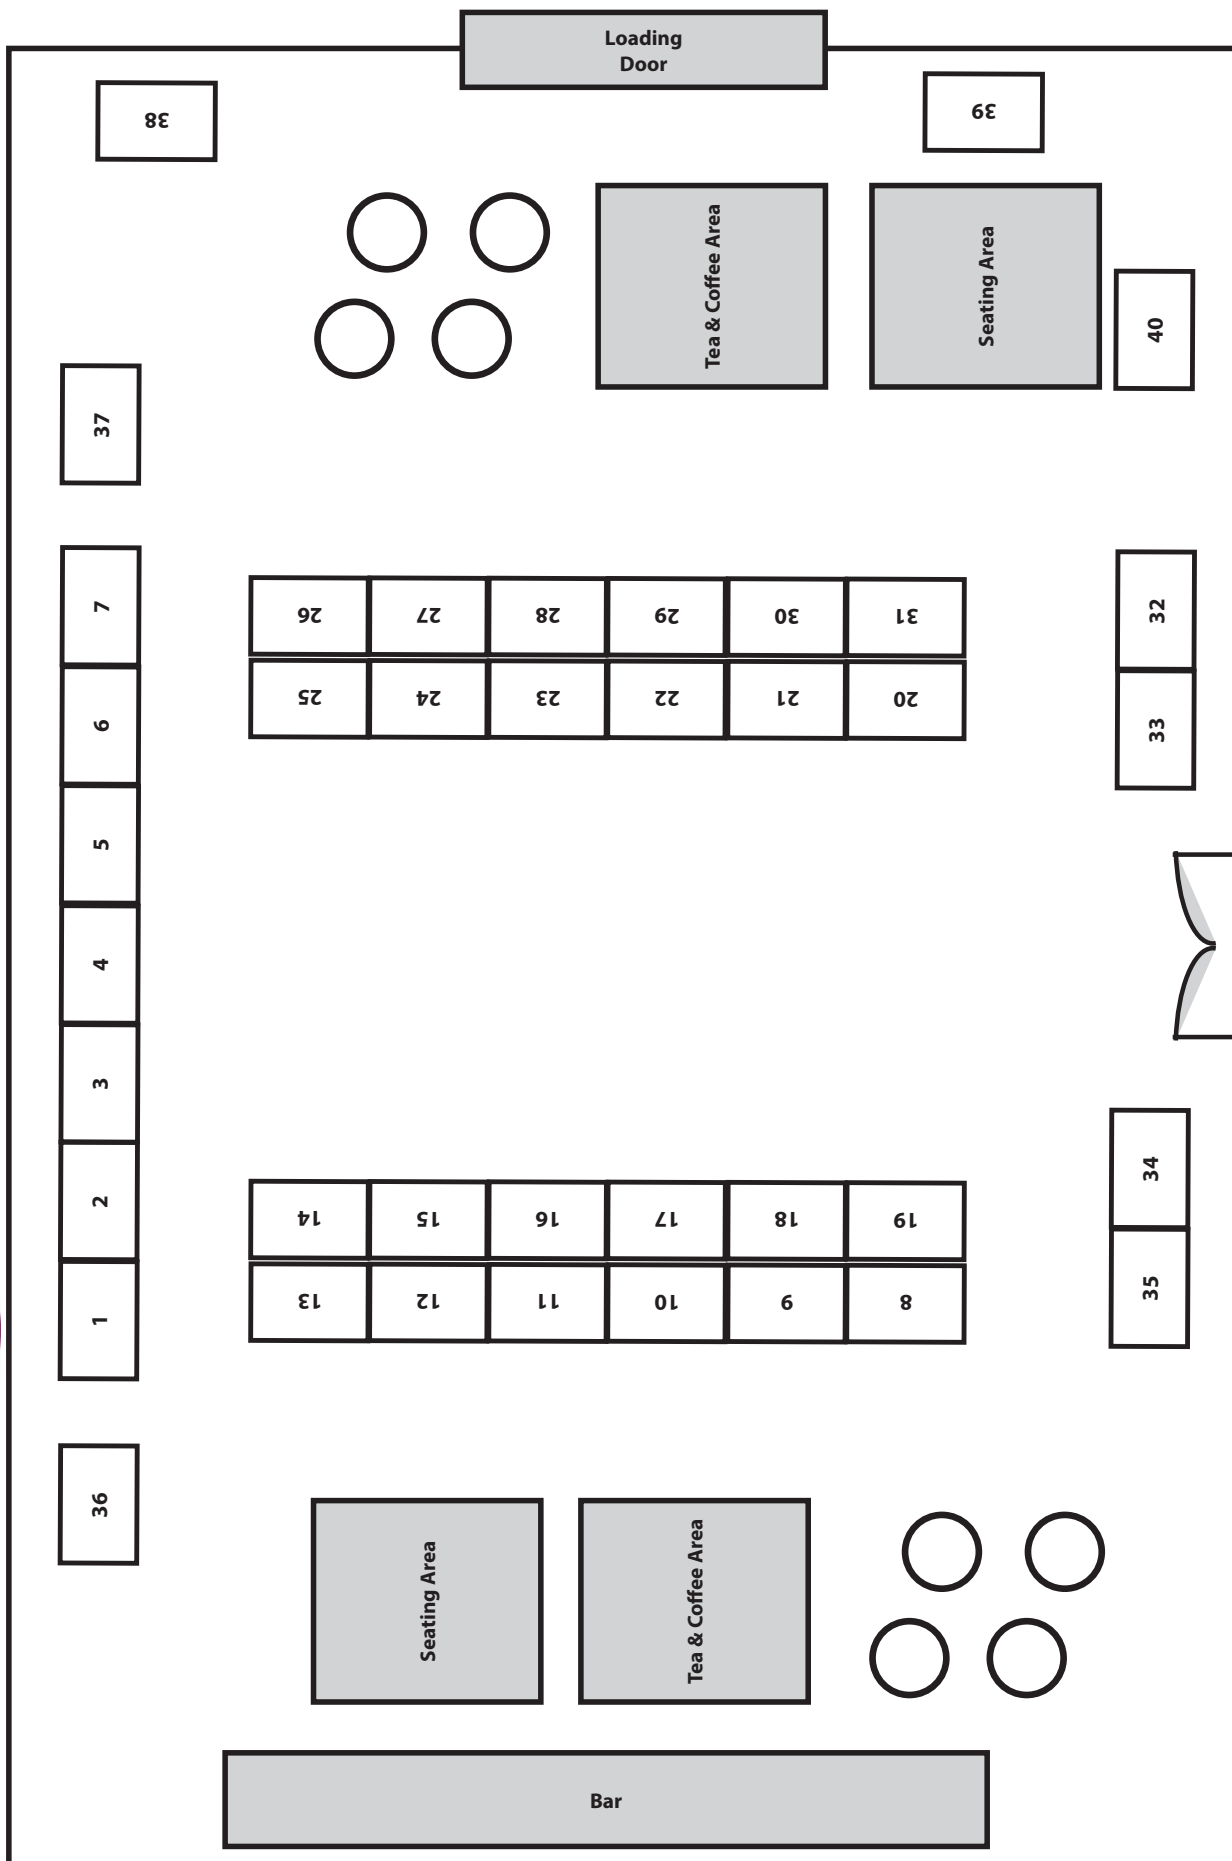

## **Striving for excellence awards**

Sponsored by Bucher Municipal and Econ Engineering Ltd

# Speakers

**Mo Baines, Chief Executive, APSE**

Mo's career in local government began in 1989 working for Manchester City Council's City Solicitors division. In 1993 Mo moved to the Council's Tendering Unit providing operational, employment and strategic support to inhouse teams subject to competitive tendering processes. Mo helped implement a number of service reviews and service improvement plans, with regular involvement across a range of local authorities and trade unions. Following a move to the Association for Public Service Excellence in 2004 Mo was Principal Advisor for the North of England, followed by Head of Communication and Coordination working on the Associations many research projects and is responsible for APSE press and media activities, and coordinating the work of the membership resources team. Mo is the Association's Chief Executive.

**Hollie Whitfield, Senior Policy Manager, Recycling, Scottish Government**

Hollie Whitfield is a Senior Policy Manager in the Recycling Team at the Scottish Government, helping shape policies to promote sustainable resource use and the Circular Economy. She joined Ministerial Private Office in the Scottish Government in 2018 in Communities and Local Government.

Driven by a passion for tackling the climate emergency, she moved to the Circular Economy Policy team in 2022, contributing to the development of the Circular Economy Act before joining the Recycling Team.

**Charlie Devine, Service Manager, Waste Partnership, Dundee City Council**

Charlie has been involved in Resource Management for over 30 years and is currently working with Dundee City Council as the Service Manager for the

# Speakers

Waste Partnership where he manages the long-term treatment and disposal of the Council's residual waste. Prior to taking up his current post, Charlie was Head of Resource Management at Zero Waste Scotland where he was involved in a range of support programmes for local authority, private sector and community sector resource management programmes and initiatives.

**Heather McLaughlin, Campaigns and Social Innovation Manager, Keep Scotland Beautiful**

Heather joined Keep Scotland Beautiful in July 2017 and is now the Campaigns and Social Innovation Manager.

In her current role she looks after a portfolio of campaigns and programmes including key actions as part of the National Litter and Flytipping Strategy and Marine Litter Strategy, and campaigns like Cup Movement, Spring Clean and supports the charity's work on key policy areas like single-use vapes and cups and DRS packaging EPR.

**Gordon Thomson, Head of Vehicle Testing and Approvals Service/Policy, Driver and Vehicle Standards**

Gordon has a wealth of experience in the commercial vehicle industry, including vehicle testing, enforcement, policy, and people management. He has extensive experience of delivering operational and policy outcomes at a senior level, working with industry partners within the UK and Europe. His current responsibilities include, strategic direction, policy setting, and outcomes associated with heavy vehicle testing and specialist tests, such as vehicle approvals – including the transformation and improvement of DVSA's commercial vehicle digital service.

**Phil Lloyd, Head of Engineering Policy, Logistics UK**

Phil spent most of his career with the Driver & Vehicle Standards Agency

# Speakers

(DVSA) in a range of operational roles, including auditing, training and vehicle certification. For the last 13 years with DVSA Phil held a variety of senior management positions including; Head of: Operations; Policy; Strategy & Planning; and Transformation, leading the implementation of their Testing Transformation project and developing their Roadside Enforcement Strategy.

Before joining Logistics UK, Phil was a self-employed contractor, providing technical training and consultancy.

**Nicole Still, Riverwoods Project Manager, Scottish Wildlife Trust**

As the Riverwoods Project Manager, Nicole leads on the delivery of the Blueprint Project, a four-year £3.5 million project funded by the National Lottery Heritage Fund and others that sits at the core of Riverwoods initiative's partnership activities and aims to develop a practical blueprint for river woodland restoration and creation across Scotland. She has spent the last decade researching and working in temperate forests across Europe and North America on restoration, conservation, and invasive species management.

**Fiona Sutton-Wilson, Head of APSE Training, APSE**

Fiona has worked in the local government space for more than 30 years. Starting her career, on the frontline in youth and community services in 1992, Fiona is passionate about delivering outstanding services which make a difference in local communities. Fiona moved to APSE, as the Head of APSE Training, in 2019, where she oversees a team of core staff and Associate trainers in providing inspiring learning and development opportunities which nurture talent and enable professional growth. Fiona is a Chartered Fellow of the CIPD, is Prince2 and MSP certified, has a Post-graduate Diploma in Business Administration (DMS), and is a qualified teacher (QTS) with a PGCE in Secondary Education.

# Speakers

**Louise Melville, Principal Advisor,  
APSE**

Louise Melville is the Principal Advisor for APSE in Scotland and is responsible for all of the membership resource functions undertaken in Scotland including areas such as Waste and Recycling, Fleet, Transport and Vehicle Maintenance as well as Parks, Grounds and Street Scene. Louise began her career in local government over 20 years ago, joining South Lanarkshire Council's Benefits and Revenue team following graduating from Glasgow Caledonian University with a 2:1 (Hons) in Business Information Management. Louise then moved to APSE Scotland following her successful appointment as Marketing and Research Officer in March 2001 and has continued to develop her skills and knowledge for local government frontline services within different roles of the Association, before being appointed Principal Advisor for Scotland in 2013. As well as covering APSE Scotland as a whole, Louise also undertakes other responsibilities including providing the secretariat function to the Scotland Litter Manager Network, is a committee member of the

SWITCH Forum and has provided evidence to Scottish Parliament and Government on various subjects on behalf of APSE Scotland.

**Josh Klein-Davies, National Account  
Manager, Intelligent Fingerprinting**

I'm Josh Klein-Davies, National Account Manager at Intelligent Fingerprinting, where I've worked for the past five years. My role involves partnering with businesses across a wide range of sectors, including construction, logistics, and manufacturing, to deliver our innovative fingerprint drug testing technology.

Over the years, I've helped major national and regional clients modernise their approach to workplace drug testing by implementing a faster, more hygienic, and less invasive testing method. I take pride in building long-term relationships with clients, understanding the specific challenges of their industries, and tailoring solutions that support safety, compliance, and productivity.

# Speakers

**Terry Elvin, Head of UK Sales,  
Intelligent Fingerprinting**

Terry Elvin is the Head of UK Sales at Intelligent Fingerprinting, a position he has held since 2021. With over 20 years of experience in sales and sales management, Terry has built a career around aligning personal values with business goals. His leadership is driven by core principles of integrity, customer satisfaction, and fostering an independent, passionate team. Committed to continuous improvement and innovation, Terry plays a key role in ensuring Intelligent Fingerprinting remains at the forefront of industry thought leadership.

Government on DRS, Defra/DESNZ on ETS, and Scottish Government on a digital landscape review within health and social care.

Previously Louise ran her own micro consultancy (Ecocentric) and worked with a range of clients including ZWS, NHSScotland and as an APSE associate. She also worked at ZWS as a Recycling Sector Manager.

Outside of work, Louise lives in East Renfrewshire with husband Graham and golden retriever Millie. She is a keen runner, although that's on the back burner just now with a baby due in September.

**David Robertson, Independent  
Environmental Services Consultant**

David has worked in the waste industry for 25 years and has been supporting APSE clients since 2018. He combines his academic background in business strategy with a passion for environmental issues, therefore working in waste and environmental services has been the natural choice. From his early days supporting Student Unions, he quickly graduated to Prisons, before being released into local government, where he has been planning and

**Louise Cowan, Strategy Director -  
Climate, Local Partnerships**

Louise is a Director at Local Partnerships where she provides policy support to local and central governments. Her recent work includes supporting Welsh

# Speakers

delivering household waste services across the UK. In more recent times this has led to a passion for new technologies, combining this with cultural change to create services which continuously improve and evolve. When asked what he really wants in life he replied 'World peace, and one of those packets of wine gums with only red and black ones in it'.

**Victoria Davies, Traffic  
Commissioners for Great Britain,  
Traffic Commissioner for Wales**

Victoria Davies was appointed as the Traffic Commissioner for Wales in 2020. She has over 30 years' legal experience as a government and regulatory lawyer having worked as a senior lawyer at the Welsh Government and at DfT in London. Victoria also worked in the advisory and litigation teams of the Health and Safety Executive Solicitor's Office. As a qualified Scots lawyer, Victoria previously practised in Scotland, where she worked as a Procurator Fiscal Depute prosecuting criminal cases.

**Gordon Manson, Programme Manager  
- Technical Projects**

Gordon has worked in sustainable transport for the last seven years. Prior to this, he held business development and operations management roles in the recycling sector. Gordon currently leads the technical team at Energy Saving Trust. His team have responsibility for delivering the fleet decarbonisation support programme for the Scottish public sector, compiling best practice guidance for public charging infrastructure projects, and overseeing EST's business transport and taxi advice programmes.

Part of the  
Avis network

ACL has established a strong reputation in the vehicle sales, service, and rental sectors since its founding in 1998. With over 25 years of industry experience, we have diversified our offerings to meet the varied needs of both public and private clients. We provide high-quality vehicles on demand throughout the UK, and our committed team prioritises exceptional customer service, ensuring that every client achieves the highest level of satisfaction.

Whether for sales, service, or rental, ACL is equipped to efficiently meet your vehicle needs with professionalism. Since our acquisition by Avis Budget Group in 2018, we have enhanced our service offerings, allowing us to provide an even broader selection of vans and to efficiently deliver vehicles to our business clients across the UK. We take pride in our strong relationships with local authorities and private businesses across Scotland, who rely on us for swift and reliable vehicle solutions.

Our commitment to service excellence has been consistently recognized, and we have received numerous accolades including:

- Scotland Excel Framework<sup>\*\*</sup>: Recognized as a top supplier in various categories
- Procurement for Housing (PFH)<sup>\*\*</sup>: Awarded as the leading supplier for Contract and Daily Vehicle Rental
- GO Best Service Award<sup>\*\*</sup>: Finalist for contractors serving the Scottish public sector in 2017/18
- Scotland Excel Supplier Excellence<sup>\*\*</sup>: Finalist for Community Benefit Excellence in 2018

The Aebi Schmidt Group is a global leader of smart product systems and services for the treatment of mission-critical infrastructural and agricultural area with a product range including everything from our Award winning environmentally friendly E-Swingo Sweeper, Flexigo multipurpose tool carrier through to full-size Truck Mounted Machines, Airport Sweepers, Gritters, Snow Ploughs and Specialised Airport and Snow Clearing Equipment. Our state-of-the-art Scottish sales and service centre based in Bellshill has facilities to repair, refurbish and maintain the range of equipment we supply with our workshop-based engineers and to compliment this we also have a team of fully equipped mobile service engineers strategically based across Scotland.

We pride ourselves on delivering a dedicated service that focuses on the individual requirements of our customers. At the same time, we believe in building long-lasting and trusted relationships with our customers, so that we can deliver the products and services that they demand. For us, customer service is key, and this is why in Scotland John Thomson heads up both the sales and service operations with a mandate to deliver a service experience that is best in the industry.

Our unique variety of product comprises our own vehicles as well as innovative attachable and demountable devices for individual vehicle equipment. A support and service programme perfectly tailored to sophisticated customer needs offers the appropriate solution to nearly any challenge. Based on our competitive product range, our mission is to strive for total solutions, enabling an economic, safe and traceable clearing. Our ultimate mission is to improve the performance of our customers.

## Agrovista Amenity – Innovation in Action

Agrovista Amenity, the specialist division of Agrovista UK Ltd, is proud to offer research-driven advice, market-leading customer service and innovative solutions to the amenity and landscape sectors. We supply a comprehensive range of products including fertilisers, herbicides, sprayers, spreaders, premium grass seed, biodegradable Tree Hugger guards and expert agronomic guidance.

We're excited to showcase the RM21, distributed exclusively by Agrovista – a game-changing machine that combines line marking and mowing in a single autonomous unit. Unlike traditional robots or standalone mowers, the RM21 cuts and marks pitches simultaneously. Its modular design supports a growing list of attachments including an automated dew brush, grass collector and ball picker, making it a versatile asset for grounds teams across sports facilities, golf courses and more.

Visitors can also view a selection of products available exclusively in Scotland through Agrovista, including Pellenc battery-powered maintenance tools and the Etesia ET Lander.

Pellenc tools offer industry-leading runtimes and durability, with batteries and tools that are up to 99% recyclable. The intelligent charging station enables off-peak electricity use, tracks petrol savings and CO<sub>2</sub> reductions, and provides monthly reports.

The ET Lander, new to the UK, is a two-seater utility vehicle with a fully enclosed cab, lithium or lead acid power options, up to 140km range, and a 940kg payload. With bespoke build options including three-way tipping, remote control and water tanks, it's the ultimate workhorse for modern grounds teams.

Contact Allan Wright 07966 022517 [allan.wright@agrovista.co.uk](mailto:allan.wright@agrovista.co.uk) for further information.

Allison Transmission is a leading designer and manufacturer of propulsion solutions for commercial and defense vehicles and the largest global manufacturer of medium- and heavy-duty fully automatic transmissions that Improve the Way the World Works. Allison products are used in a wide variety of applications, including on-highway vehicles (distribution, refuse, construction, agriculture, fire and emergency), buses (school, transit and coach), motorhomes, off-highway vehicles and equipment (energy, mining and construction applications) and defense vehicles (tactical wheeled and tracked).

Founded in 1915, the company is headquartered in Indianapolis, Indiana, USA. With a presence in more than 150 countries, Allison has regional headquarters in the Netherlands, China and Brazil, manufacturing facilities in the USA, Hungary and India, as well as global engineering resources, including electrification engineering centres in Indianapolis, Indiana, Auburn Hills, Michigan and London in the United Kingdom. Allison also has approximately 1,600 independent distributor and dealer locations worldwide.

The Allison team will be on hand at APSE Scotland Fleet, Waste and Grounds Seminar 2025 to help fleets navigate the powertrain choices available to them in the energy transition. Allison's latest products including the xFE (for extra fuel economy) transmissions and FuelSense 2.0 software technology, are designed to make today's conventional powertrains as clean and efficient as possible. Allison launched its eGen Power electric axle range in 2020, which brings unmatched efficiency and high performance to heavy trucks.

Since 2012, Alltruck Group has been a trusted name in heavy commercial fleet solutions across Scotland, delivering high-quality trucks and expert fleet management services. With strategically located facilities in Central Scotland, we offer contract hire & leasing, truck & van rental, commercial vehicle repair & maintenance, mobile fleet support, and new & used truck sales—all under one roof.

As an official Mercedes-Benz & FUSO service and parts agent, we supply genuine parts and expert service to local authorities, ensuring compliance, efficiency, and minimal downtime. As Scotland's main dealer for FASSI cranes, we provide crane sales, installations, repairs, and testing, reinforcing our comprehensive fleet support.

We take a partnership approach, working closely with SMEs, local authorities, and fleet operators to streamline operations and reduce costs. As an independent supplier, we provide trucks from all leading brands, including DAF, MAN, Mercedes-Benz, and Volvo, with a variety of body types such as box, curtain, flatbed, crane trucks, and tractor units.

With in-house control over chassis sourcing, maintenance, and disposals, we offer a single point of contact for all your heavy commercial fleet needs. Whether you manage a small fleet or a large-scale operation, Alltruck Group delivers industry-leading solutions to keep your vehicles moving. Contact us today at 01324 374 311 or visit [www.alltruck.co.uk](http://www.alltruck.co.uk) to discover how we can support your fleet.

A.M. Phillip Trucktech are a premier IVECO, Ford and FIAT Professional dealer group with numerous

locations across Scotland. Since being founded in 1955, we have provided top-quality commercial vehicles and exceptional customer care to businesses throughout Scotland.

Through our commitment to excellence, we have grown into a thriving dealer network, offering a comprehensive range of services including new and used vehicle sales, rental, and aftersales care. Here at A.M. Phillip Trucktech, our customer is our priority.

Our diverse vehicle lineup caters to businesses of all sizes and industries. Whether you're a sole trader in need of a reliable small van, a construction manager seeking a rugged pickup truck, or a fleet manager requiring multiple large vans for long-distance transportation, we have the perfect solution for you.

In addition to our new vehicle offerings, we also maintain a fantastic selection of carefully inspected and approved used commercial vehicles. Are you looking to invest in a greener mode of transport for your business by switching to a zero-emissions solution? We also specialise in the sale and servicing of electric and hybrid commercial vehicles too.

For those in need of short-term transportation solutions, our rental fleet includes a variety of vans, curtain-side trucks, and articulated tractor units. To keep your commercial vehicles running at peak performance, we provide a variety of aftersales services, including routine maintenance and servicing, accident repairs, MOT testing, tyre fitting and replacement, plus access to a wide range of parts and accessories.

## **Arnold Clark** COACHBUILDERS

Arnold Clark Coachbuilders have been building Commercial Vehicle bodies since 1983 and work with Commercial Vehicle dealers across the UK from our 45,000sq ft factory in East Kilbride. With a large skilled workforce and continuous investment in the latest manufacturing technologies and equipment, we have the capability to build 'one-off' bespoke conversions through to large vehicle fleets.

# Exhibitors

With decades of experience in building Tippers, Bin Lifters, Lutons, Minibuses, Wheelchair Adapted Vehicles and many specialised vehicles and working closely with the end user through the design stage, we make sure that the vehicles are built to the highest standard and are all compliant to the current legislation. With Type Approval for most makes of vehicles, destination codes from vehicle manufacturers and access to our Group transport network, we make the conversion journey from chassis to completed vehicle as smooth as possible.

We also undertake refurbishment and repair of existing fleets with our Coachbuilders and Bodyshop under one roof and have adapted many vehicle uses including Library Vehicles, Community Youth Buses and Mobile Catering Vans.

We are approved installation partners for VB Air Suspension Systems, Vanweigh Overload Protection Systems, Speedliner and supply and install Racking, Beacons, Tail Lifts, Fall Arrest, Cages and all accessories that fleets may require.

At Athlon, we know fleet and mobility. Our knowledge and experience, together with a legacy of over 100 years, allows us to take your business one step closer to a safer and more sustainable future. Athlon is a well-established contract hire and leasing company, supplying cars and light commercial vehicles to the public sector. We're confident we can support your fleet requirements and facilitate your journey to a more sustainable or fully electric fleet.

In addition to vehicle funding, fleet management and consultancy, we offer a range of tailored solutions such as our salary sacrifice scheme, Salary Exchange, and our service, maintenance, and repair (SMR) product, Athlon365. We are proud to be on major public sector frameworks and support a wide range of industries including healthcare, councils, housing associations and government bodies.

Our dedicated public sector team works to guide, support and deliver solutions for each customer. With our local expertise, global knowledge, and as

part of one of the world's leading brands – Mercedes-Benz Mobility – we can offer a range of effective leasing solutions, fleet management and consultancy across all major multi-marque vehicles. Whether it's a standard vehicle or bespoke conversion, with Athlon you're guaranteed a partner, no matter your fleet size.

B&B Contracts Ltd is a family run business formed in 1989 by Scot Barr and is situated in Lesmahagow, Scotland. We specialise in supplying Oletto hotboxes. All our vehicles are high-spec at very competitive rates, with a guarantee of an excellent backup service and efficient after sales. We are the UK agent for Oletto. These asphalt containers are the most cost efficient and ideal method for repair of road surfaces after work carried out for installation of services or small repairs i.e. pothole filling & repatching roads. They ensure minimum waste of materials as there is no loss in temperature, it can also be kept at the correct temperature overnight using gas heating system. We have several different sizes available depending on what the needs of the customer are, single or twin chambers, dedicated or demountable units. Our workshop services can manufacture Hotboxes for the specific customer requirements, we also refurbish and alter all makes of Hotboxes from 1tonne up to 20tonne and can be demount or fully dedicated to a specific vehicle. All our hotboxes have Hardox augers and troughs as standard (better for the granite type stone which is used in Scotland and Wales). We also supply an excellent back up service in sales, service, parts and rental. We also carry out repairs and servicing to any machine that is used in roads maintenance i.e. sprayers, static hotbox, asphalt recyclers and white liners. We have a strict policy on the maintenance of our vehicles and pride ourselves in offering a first class service in hire and sales and believe that we are one of the best hotbox companies in the United Kingdom.

Bartec Municipal Technologies is a leading supplier of waste management software. Our comprehensive software solutions are designed to streamline operations, enhance customer service, and reduce costs for municipalities and private sector clients alike.

We offer a range of innovative products and services tailored to meet the diverse needs of our clients. Our flagship product, Collective, is a versatile platform that manages various aspects of waste management, including domestic, commercial, food, and garden waste. By leveraging advanced analytics and telematics, Collective provides a clear view of day-to-day operations, enabling clients to optimise their service offerings for maximum efficiency and profitability.

In addition to waste management, we provide solutions for fleet management, risk assessment, and routing. Our fleet management system tracks vehicles, optimises routes, and analyses driver performance to ensure smooth and efficient operations. The risk assessment module offers real-time updates on safety advice and guidance for waste collection sites and streets, while the routing system plans the most efficient routes to deliver consistent and reliable services to customers.

We have supplied mobile, in-cab, and back-office systems to UK municipalities since 2005. Today, 3500 frontline municipal crews in over 100 councils use our systems every day. Our systems and technologies are used in large cities, small boroughs, and large unitary authorities in England, Scotland, and Wales. Millions of households have their waste collected every week by crews using Collective.

BLS Truck and Van stands as a cornerstone of excellence in the realm of commercial vehicles, as a dealership for all commercial vehicle needs in North Scotland. Since 2018, as a member of the Leo Group and a member of the Mercedes-Benz network, we bring a wealth of expertise and dedication.

Situated in the city of Aberdeen, our dealership strategically caters to the expansive region of North Scotland, ensuring businesses across urban centres and remote countryside have access to top-tier commercial vehicles and services.

Our listings at BLS Truck and Van are extensive, meeting all your commercial vehicle requirements. Whether you're seeking the latest all-electric models or ice vehicles, we have you covered. Our diverse options include the innovative eCitan, eVito, eVito Tourer, and eSprinter, Sprinter, Vito, and Citan vans. Our truck range extends to trucks such as eActros, Atego, Actros, Arocs, eEconic, and Econic, alongside FUSO Canter and eCanter, a perfect solution for every business need.

At BLS Truck and Van, we prioritize building relationships and providing unparalleled service throughout your journey. Our team of dedicated professionals is committed to delivering exceptional customer service, ensuring that every interaction with us exceeds your expectations, whether you're in the market for a new vehicle, require maintenance or repairs, or seek genuine trade parts.

Driven by a passion for excellence, BLS Truck and Van is your trusted partner in achieving success. With a firm commitment to quality, reliability, and customer satisfaction, we uphold the highest standards in everything we do.

Brigade Electronics is a global market leader of safety devices, with solutions to suit all commercial vehicles and mobile plant.

In operation since 1976, Brigade was the first company to introduce reversing alarms to the UK, and over the decades has consistently been at the forefront of road safety. Brigade's wealth of experience has gained them a reputation for expertise within the industry and a knowledge of the problems their customers face. This has led to a complementary range of passive and active systems designed to reduce the risk of collisions, protect workers, pedestrians and cyclists, and assist the driver by minimising vehicle blind-spots, whilst also meeting UK specifications including FORS, CLOCS and The Direct Vision Standard.

Brigade's product range includes 360° camera systems, cameras, monitors, white sound® reversing alarms, obstacle detection sensors, obstacle detection radars, predictive collision systems, telematics and digital recorders.

With a mission to save lives by making roads and worksites safer for all, Brigade is ISO 9001 Quality Management certified for their quality products, which undergo rigorous and comprehensive testing to ensure they are fit for purpose. In addition, Brigade offers an outstanding installation service through its nationwide network of Brigade approved, professional and trained fitters who ensure all products are fitted to the highest standards.

## BUCHER municipal

At Bucher Municipal, we produce only the highest quality machines across the road sweeping, sewer cleaning and winter maintenance industries.

Over the 200 year heritage of Bucher, we've constantly been driven by change, ensuring clean and safe environments, while embedding continuous improvement into everything we do. Our rich history of specialised engineering solutions has led to improved technology, better solutions and has always been driven by a focus on quality and reliability. This experience allows us to focus on the evolution of our products and more importantly adapt our units to be the best they can be for you, and the environment.

As the nation looks towards a greener future, we are pleased to be able to offer an electric vehicle alternative across all our divisions, reducing operational costs and significantly reducing emissions. Our environmental solutions reduce fuel consumption, improve air pollution, and save millions of litres of fresh water annually.

Bucher Municipal is a brand you can trust & rely on. With six strategically placed service centres and over seventy factory trained engineers at your disposal, we have got you covered if anything goes wrong, and support is always within easy reach.

At Bucher Municipal, we strive to develop intelligent solutions that enable you to meet current demands and stay ahead of future change, leading the way towards smarter technologies and alternative energy sources.

Bucher Municipal - Driven by Better

# Exhibitors

premises with more than 20,000ft<sup>2</sup> of workshop space divided into-Coach-Building, Fabrication, Auto electrical, Shop-fitting and Finishing/Pre-delivery inspection. Vital to on-going, in-life “Technical Support” backs up our philosophy of providing a premium service.

Cebotec's core activity is the production of non-standard/bespoke commercial vehicles and trailers on behalf of a wide and diverse range of clients. We have increased our business and offer, via our hire department, a fleet of mostly but not exclusively converted vehicles that are available for short and long-term hire. It is important to know that all vehicles produced for both elements of our business are to the same high standards to ensure reliability and durability in service, all at highly competitive rates.

Currently our vehicles are operated by Organisations that include Local Authorities, Police, Mountain Rescue, Corporate businesses and Utility companies. These are not conclusive but demonstrates the extent of our portfolio of major clients.

Cebotec are delighted to be part of the MUFG (Formerly LINK Asset) Vehicle Procurement and Funding Framework for Conversion, Contract Hire & Flexi Hire. We are also an approved supplier for the supply of vehicle conversions on behalf of UK Blue-light organisations via national framework agreements.

Cebotec's Hire Fleet consists of a wide range of standard and non-standard vehicles to several public-sector operations. We welcome the opportunity to meet you and discuss where we can assist with your current and future fleet requirements.

Ongoing collaboration with Elgin & Edinburgh based FMS Vehicle Rental Ltd. encompassing rental and workshop services, focus on in-house vehicle maintenance, repair and warranty services. We are delighted to announce our increased offering in the vehicle rental market including Halton Housing & Scotland Excel frameworks.

Many Thanks to all our customers for their continued support.

For over 30 years, CONTENUR has manufactured plastic wheelie bin products for local authorities and private waste collectors. Today we are a leading global supplier in over 30 countries. Our UK manufacturing facility is supplying products to multiple authorities in Scotland: Edinburgh, Highland and P&K to name just a few and are ready to provide market leading quality products with short lead times and competitive prices.

We are passionate about sustainability and lead the market on limiting the environmental impact of our operations *AND* maintaining market leading levels of quality and compliance. Come and talk to us about 2 wheeled and 4 wheeled bins or our 'End of Life' offering for all your old and unusable bins. We look forward to welcoming you.

Dennis Eagle and Terberg Matec UK, both part of the Terberg Environmental Group, stand as industry leaders in innovative waste management solutions. With a rich heritage and a focus on cutting-edge technology, these companies are revolutionising the design and manufacture of refuse collection vehicles (RCVs) and waste handling equipment. Dennis Eagle UK is renowned for its comprehensive approach to RCV production.

The company specialises in creating fully integrated solutions, designing chassis, bodies, and bin lifts that work seamlessly together. Dennis Eagle made history by introducing the first low-entry chassis to improve operational safety and launching the eCollect, a fully electric RCV. With over 1,000 vehicles supplied annually to local authorities and private contractors in the UK, Dennis Eagle also reaches international markets, including Europe, Australia, and the USA. Its advanced telematics system, Terberg-Connect, optimizes fleet management, ensuring maximum efficiency for customers.

Terberg Matec UK, based in Warrington and Worksop, complements this innovation with expertise in waste handling equipment. The Worksop facility produces specialised vehicles, such as the Kerbloader and Toploader, while the Warrington site houses state-of-the-art service and

support operations. Additionally, a Nottinghamshire workshop offers extensive maintenance services, from inspections to full refurbishments.

Together, Dennis Eagle and Terberg Matec UK deliver unparalleled customer service, sustainability, and operational excellence, reinforcing their position as pioneers in the waste and recycling industry. Their commitment to innovation continues to shape the future of environmentally responsible waste management.

Ford Motor Company continues to lead the automotive industry in 2025, embracing innovation and sustainability. With a strong focus on electric and hybrid vehicles, Ford has introduced cutting-edge models like the all-electric Ford Capri, the plug-in hybrid Ford Transit Custom and Plug-in Hybrid Connect, catering to the growing demand for eco-friendly transportation. The company remains committed to reducing its carbon footprint, aligning with the UK's ambitious net-zero goals.

Ford Motor Company is pushing boundaries and embracing the future with its bold "Ford+ Plan" vision. The Ford+ Plan highlights its commitment to delivering innovative, high-quality products that customers truly value, ranging from fuel-efficient vehicles to rugged, durable trucks and versatile utility models.

By 2035, Ford aims to achieve a fully electric lineup and carbon-neutral operations across Europe, aligning with its global sustainability goals.

Ford Pro™, our commercial offering, simplifies the management of commercial vehicles by offering a seamless, end-to-end fleet solution. This includes vehicle selection, intelligent fleet management software, charging solutions, maintenance, and financing services—all designed to maximize productivity. The FORDLive suite further enhances commercial vehicle operations by boosting uptime through its connected, integrated aftersales services.

This year, Ford is excited to showcase its latest developments at APSE. You can discuss our new vehicle offerings, engage with your Business Manager, and learn about Ford's innovative advancements driving the future of mobility. The journey ahead is electric, efficient, and exceptional.

Econ Engineering has been at the forefront of highway maintenance vehicle manufacturing for over 50 years, supplying local authorities and contractors across the UK with high-quality, innovative solutions.

As the UK's leading manufacturer of gritters, snowploughs, and multipurpose highway maintenance vehicles, we are dedicated to helping keep roads safe and operational all year round. Our extensive product range includes purpose-built winter maintenance vehicles, all-season demountable bodies, and fully electric and hydrogen-ready solutions that support sustainability and environmental goals.

We design and manufacture all our vehicles at our state-of-the-art headquarters in Ripon, North Yorkshire, alongside our strategically located service depots in Sowerby, Thirsk, Alloa, Scotland, Cardiff, Wales and Halesworth, Suffolk. This ensures that our customers benefit from industry-leading aftersales support, rapid response maintenance, and expert training.

Innovation is at the heart of everything we do. Our ongoing investment in research and development has led to the introduction of cutting-edge technologies, including digital control systems, data-driven fleet management tools, and alternative fuel solutions to meet the evolving needs of the industry.

We are proud to support councils and private sector operators in delivering efficient, reliable, and environmentally conscious fleet operations. Join us at the APSE Scotland – Fleet, Waste, and Grounds Seminar to discover how Econ can help future-proof your winter maintenance and highway service fleet. mind. No-one knows your own challenges better than you. Whether you are looking to tackle grey fleet, project/season-based pressure on your own fleet, incoming LEZ or ULEZ challenges, renewing HGV fleet, introduction of new services, requirements for specialist Traffic Management vehicles, or facing any of the hundreds of challenges you may have around your fleet and mobility in general, one solution cannot fit all. We listen and we find solutions to suit you specifically. More than just renting Cars and Vans:

Whether it's Cars, LCVs, HGVs, Temperature-controlled, Tippers, Grabs, Accessible or others, getting the right vehicle for your needs can be the difference between keeping your services running and failing to deliver. With a fleet of over 50,000 Commercial Vehicles in the UK, we have stock incoming helping you drive down lead times. Vehicle customisation and Bespoke builds also available.

Envevo, the UK's leading specialist in EV charging infrastructure solutions, has grown significantly over the past year, focusing on Fleet and On-Street Charging turnkey installation. With operational coverage across the UK and Ireland, they have completed over 3,000 projects, across Forecourt, eBus, eHGV, Workplace and EV Hubs.

Envevo's comprehensive turnkey solution includes everything from grid connections as a NERS accredited ICP to on-site infrastructure, managed by skilled design and installation teams. Their in-house delivery capability ensures safety and quality throughout the project lifecycle, from concept to construction and ongoing operations. This end-to-end approach helps clients meet programme timelines, improve procurement processes, and address legal matters.

Their extensive experience in constructing complex grid infrastructure has demonstrated the importance of seamless solutions. Envevo's consultative approach ensures timely and budget-conscious EV installations. The design, installation, and commissioning of charging infrastructure are crucial from commercial, spatial planning, safety, and technical standpoints. Equally important is the ongoing operational performance of the infrastructure.

Envevo's Planned Preventative Maintenance (PPM) and Responsive Services offer a comprehensive solution to ensure infrastructure resilience, supported by a dedicated Operational Services Team. Their commitment to long-term customer relationships is evident in their high customer retention rate.

"Envevo is a trusted and valued EV infrastructure partner with whom we have worked for several years. Their partnership approach, experience, and comprehensive capability have been instrumental in supporting our EV bus fleet transition across multiple depots while maintaining daily operations."

Fairways GM is a leading supplier of groundcare equipment to the public sector.

Widely regarded for the supply of machinery, parts and first-class service, we are the exclusive partner of both Ransomes Jacobsen Ltd and Wiedenmann UK in Scotland. We also represent brands like ISEKI, Wessex International, Gambetti, Cushman, EZGO, Kawasaki, Maredo and Agria.

Established in 2004 we have premises in Kinross, Inchinnan, Aberdeen and Inverness.

Whether you are after a fleet of machines or a choice single item, our team can help you identify what best suits your application.

Once the sale is complete, be assured we have an overriding commitment to continue to look after you. Our company has established strong partnerships with its suppliers to deliver quality products, backed by professional customer support.

At Fairways, we hold extensive OEM parts stock so that we can help get you the correct part for your machine as quickly as possible.

From our four depots covering all of Scotland, our field service engineers are uniquely placed to respond quickly and effectively to all types of machine breakdowns. We have gained a reputation for our customers back up and support which is market leading.

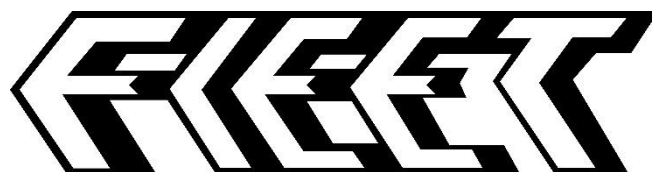

Faun Zoeller UK are a wholly owned subsidiary of the KIRCHHOFF Group. With factories across the globe, we produce automotive parts, tools, mobility equipment, refuse collection bodies, lifters and road sweepers. With over 46 Factories across 3 continents, the company has grown significantly from its origins which began in 1785!

Our automotive sector experience has been transferred to RCV production and investment in innovation and technology is at the forefront of the design and manufacture of the products. This ensures that all of our products have superior build quality and consistency that this technology facilitates.

Globally, we have an extensive service network with over 500 engineers and offer a class leading aftermarket provision, ensuring that all of our products are renowned for quality and innovation. With preferred partner workshops and our own team of over 20 fully equipped, qualified mobile engineers, we make sure that investing in our product is not just for today, but for the whole life of the vehicle.

As part of our UK organisation, we also offer long and short term hire, along with full refurbishment facilities and repairs, so we can offer a true "One Stop Shop"...

Encompassed within the group is our ENGINIUS brand. Europe's first vehicle manufacturer with EU type approval for trucks that are powered by a hydrogen fuel cell system (FCEV) and has full OEM status. ENGINIUS provide an emission-free truck with various wheelbases for use in waste and haulage applications, without sacrificing payload or body volume. Innovation drives us....

Fleet Factors is one of the largest independent wholesalers for vehicle parts, refinish products, and PPE in the UK. The company was founded in Teesside in November 1975 as a family-run business.

# Exhibitors

Founded in 1975, over the years we have expanded into one of the largest independent wholesalers for vehicle parts, acquiring several independent companies over the years. We have 20+ depots across the country from the Highlands of Scotland down to Poole, in the Southern region of England, with our Head Office located in Middlesbrough.

Fleet Factors Stores Management System is the most effective way for companies to control their costs with zero inventory and full data capture at source. It is the choice of many large, progressive customers and blue-chip companies, who benefit from our expertise in this market.

We stock over 700,000 parts which has enabled us to be one of the UK's leading automotive parts providers. We offer a huge variety of parts ranging from Consumables, Mirrors, Wiper Blades and Batteries to Brake Discs, Clutches and Fuel Tanks to name a few.

Here at Fleet Factors, we aim to supply an extensive range of excellent quality uniforms and PPE to keep

your staff safe and protected at a competitive price, in an arranged timescale. We also understand that

your staff are the direct face of your corporate image and because of this we offer embroidery on our high-quality garments to keep your staff looking smart while representing your business.

FleetEV Limited, established in March 2021, is a Cardiff-based company dedicated to helping the public sector transition to electric vehicles (EVs). With sustainability and operational efficiency at the core of its mission, FleetEV offers a comprehensive suite of solutions designed specifically for local governments, councils, and public sector organisations seeking to adopt electric mobility.

The company specialises in EV leasing, salary sacrifice schemes, fleet solutions and the installation of EV charging infrastructure (via its sister company Plug Charging Ltd), all tailored to meet the unique requirements of public sector clients. FleetEV's team provides expert support at every stage, from selecting the most appropriate electric vehicles to managing EV charging projects,

ensuring a seamless and cost-effective transition to greener transportation.

As public sector organisations work toward sustainability goals and seek to reduce carbon emissions, FleetEV offers practical, scalable solutions to help meet these objectives. The company's services not only contribute to environmental goals but also provide significant long-term cost savings by replacing outdated, inefficient fleets with modern, eco-friendly alternatives. Additionally, EV adoption enhances the public sector's ability to lead by example in promoting sustainable practices.

Partnering with FleetEV enables public sector organisations to make tangible progress in their sustainability efforts while improving the efficiency of their operations. FleetEV's tailored solutions make it easy for local governments and public institutions to embrace a cleaner, greener future. By choosing FleetEV, you can help drive positive change within your community and contribute to a more sustainable tomorrow.

## FRASER C. ROBB

engineering support for all industries

Based in Drymen, between Glasgow and Stirling, Fraser C Robb has been at the heart of Scotland's ground care and garden equipment industry for 50 years, with its purpose-built showroom and workshop.

Their commercial clients include councils, estates, landscapers, tree surgeons, and golf courses, while domestic gardeners also rely on their quality products and dependable service. With a reputation for excellent support, Fraser C Robb serves customers across the Central Belt and beyond.

Established in 1974, Fraser C Robb has evolved alongside changing technologies, now offering an extensive range of both petrol and battery-powered

equipment options from trusted names like Stihl and Kress.

Fraser C Robb is a Scottish distributor for Avant Loaders — compact, powerful multi-purpose machines designed to handle a wide variety of landscaping, forestry, and construction tasks. Additionally, they are Scotland's sole dealer for Foamstream, an herbicide-free weed control system that uses hot water and a biodegradable foam — ideal for environmentally sensitive areas and public spaces.

Fraser C Robb is committed to helping customers choose the right equipment and supporting them with repairs and servicing, whilst operating with green credentials, helping Scotland's path to Net Zero.

This year celebrating their 50th anniversary, Fraser C Robb continues to grow and innovate — providing trusted equipment and expert knowledge to clients across Scotland.

Green Machines is among the oldest manufacturers of sweepers dating back to 1965, and our first headquarters were based in Scotland. From the very first walk-behind sweepers with their exceptional manoeuvrability developed to state-of-the-art battery and hydrogen technology present in our current sweepers. We currently operate from our head office in North Macedonia, the UK, the Netherlands, Germany, and the USA, and offer customers all around the world full support through our wider global dealership network.

We offer you a wide range of choices by providing cleaning solutions. The GM 1ze, the GM 400ze, the GM 500 ze, the GM 500H2, the GM636, GM720 and the GM 955 are responsible for the cleanliness of many world cities.

Green Machines actively participates in practical and innovative solutions with products that are sold in more than 42 countries around the world. The technical specifications perfectly enable the most specific purposes: from maintaining cleanliness in narrow streets to industrial zones, airports, cities and parks.

# Exhibitors

All of our machines are compact and swift enough to enable you to clean any urban area around the city with maximum efficiency, without worrying that they will disrupt the public. Our machines are purposefully designed in a way that does not impact normal functioning even in the busiest areas in your city.

Green Machines strives to develop and produce sustainable sweeping machines combined with

excellent performance for a better world. We are proud to take leadership in paving the path to an emission-free world.

Grillo S.p.A. was founded in 1953 under the name of "OFFICINE PINZA". Its founder, the twenty-year-old Benito Pinza invented the first Grillo walking tractor thanks to an innovative project.

The company was therefore named GRILLO in 1957, marking a milestone in the history of agricultural mechanisation.

Grillo S.p.A. has been designing and producing professional machines for both agriculture and green maintenance for over 70 years, its products being suitable not also for professional but also for domestic use.

Thanks to its highly trained and qualified staff, Grillo makes the operators' job more comfortable by constantly seeking for new technical solutions.

Each single machine undergoes very demanding quality tests to assess its reliability, in compliance with the current European standards.

Grillo S.p.A. employs the ultimate high-technology tools to produce its machines (e.g. laser-cut, robotics, semi-automatic assembly chain) and has five production plants located in the area of Cesena (Italy).

More than 20.000 machines of over 50 different models are manufactured every year and distributed in 55 countries across the five continents.

Our staff counts about 300 members and our distribution and sales network is made up of more than 1.000 dealers, over 50 distributors and 4 sales branches.

New out for 2025 is our - Grillo FK700

The FK 700 is a professional front brush cutter, designed for high performance, maximum comfort, great cutting efficiency, and low fuel consumption.

The front flail mower allows full visibility of the working area, prevents the cutting area from being pressed and facilitates cutting under low branches and bushes!

The floating cutting attachment ensures a perfect result even on undulating terrain. The pivoting rear axle and tractor-profiled front wheels provide a precise finish over bumps and hollows.

The cutting height is mechanically adjustable from a minimum of 0 cm to a maximum of 10 cm. Adjustment is quick and easy without using spacers.

Groeneveld-Beka have been manufacturing automatic and centralised greasing systems, since 1927 and are operational in 40 countries worldwide, with over 40 company owned locations. Groeneveld-Beka are a Timken Group company, with an annual group turnover of over 5.5 billion dollars.

We manufacture and sell automated greasing systems, automated oil top up systems, fluid level monitoring, Tecreel hose reel system and bypass oil filtration.

Groeneveld are OEM, with most manufacturers of trucks, trailers and off-road equipment worldwide, with 8 worldwide production factories and a head office in The Netherlands.

Groeneveld Single line heavy duty automated greasing systems are recognised by all manufactures of refuse vehicles, hook loaders, skip loaders and all municipal vehicles for being reliable,

# Exhibitors

efficient and the best product for reducing your costs and improving your efficiency.

Single line, is a parallel modular system, which has a 4kg reservoir with a spring-loaded follower plate, which prevents oxidation, water ingress and prevents grease separation, electric timer with test and diagnostic facility. The system also uses heavy duty brass blocks and individually sized metering units, from 0.025cc to 1cc, which are screwed into the blocks, supplying grease through thick 5- and 6mm piping connected to brass compression couplings.

Groeneveld-Beka are the only autolube company to have national coverage, with our own fully trained engineers for install and back up and we are the manufacturer. Twin 3, Triplus and Beka heavy grease systems are also available as OEM or aftermarket for all offroad machinery, including telehandlers and forklift trucks.

Hako Machines Ltd is one of the UK's leading manufacturers and service providers of Municipal cleaning technology, supplying the finest equipment for local authority and commercial cleaning operations.

Manufactured in Germany, our impressive range of multifunctional road sweepers are ideal for use in a variety of working environments ranging from street sweeping, weed removal and scrubbing to snow removal, gritting and even grass care. The Citymaster Road sweepers from Hako are compact, manoeuvrable and economic with diesel power and

100% electric powered machines available for purchase, lease, contract or short term hire.

Our national network of mobile engineers are supported by two UK facilities in Northants and Wakefield, ensuring the highest levels of after sales support to our customer base across the UK, with multiple innovative support packages to aid our users who choose to self-maintain their fleet or take on Hako as maintenance provider.

Hako will be displaying multiple vehicles at the APSE Fleet, Waste and Grounds Seminar 2025 alongside a range of our multi-functional attachments, ready to tackle a vast range of services that our critical to a smooth-running local authority operation. [www.hako.co.uk](http://www.hako.co.uk)

Hankook manufactures globally innovative and award-winning tyres for passenger cars, SUVs, 4x4s, vans, trucks, buses and motorsports.

Aspiring to bring consumers the utmost excellence in product quality, technological excellence and driving satisfaction, Hankook continuously invests in research and development maintaining five R&D centres and eight production facilities around the world. Bespoke tyre solutions for the European markets as well as European Original Equipment according to the requirements of leading premium car manufacturers, are developed in the company's regional Technical Centre in Hanover/Germany. Internationally leading car manufacturers including Audi, BMW, Hyundai, Mercedes-Benz, Porsche, Tesla and Volkswagen rely on tyres made by Hankook for their original equipment. Production for the European region is taking place in the state-of-the-art manufacturing site in Rácalmás, Hungary.

Hankook remains a well-recognised and respected tyre choice for fleets looking for safe, cost-effective and ecological transportation solutions. Product advancements in its new AH51 and DH51 regional steer and drive tyres produce outstanding results

with strong market leading performance, resulting in significant fuel savings, damage resistance, wet grip, and mileage benefit from the first to the last millimetre of tyre life for its premium fleet partners. The 'no compromise' development approach ensures that a low rolling resistance is kept at all stages of wear, benefitting both budget and the environment.

The company is proud to be the technical partner and exclusive tyre supplier for the Generation 3 for the FIA ABB Formula E World Championships, as well as the Lamborghini Super Trofeo. As of 2025,

# Exhibitors

Hankook is also the exclusive rally tyre supplier for the FIA World Rally Championships (WRC).

Established in 2021, Harris Vehicle Hire is the newest addition in a long line of family-owned

businesses dating back to the early 1960's and provide vehicle hire services to both public and private sectors across Scotland and the wider UK. With over 25 years' experience in the industry, the business has all the necessary tools to meet any demand across a wide variety of fleet requirements. Our business continues to expand, and we continually strive to provide the very best service with our friendly and easy to deal with values at our core. We are a well-managed and strategically funded company with strong foundations. With fleet terms in place for all major manufacturers, we are perfectly poised to carry out our service to the highest level. At the centre of our business we have vast experience through the Scotland Excel framework with our director's involvement in leading a team to be finalists 3 years in a row at the GO Awards Scotland for Best Service Award as well as Customer Service Finalists through Scotland Excel and winners in 2020.

This will be our first year as HIAB Scotland located at our new Uphall, Broxburn home, after our move from our old Cumbernauld premises.

Our new HIAB Scotland Uphall home increases our service capability with an overhead Crane and 4 permanently based mechanics for minor & major service / repair jobs, to your existing HIAB & MULTILIFT products.

We have also increased our Field Service Vans to six (6) allowing for a timeous response to breakdowns and on-site service requests.

Over and above the 10 x HIAB Engineers & mechanics we offer HIAB Pro Care R & M Contracts with our new equipment and Automatic Lubrication Systems, ensuring the longevity of your investment.

We will have on display a new truck mounted MULTILIFT XR5 Hook-Loader together with a new HIAB Crane and new DEL Tail-Lift.

Come and visit our HIAB Scotland stand and speak to Mark Taylor, Simon Eskriett or Robbie Weir about our wonderful products backed up by our industry leading after-sales deliverables.

At Hillend Engineering we have committed to a further £4M investment in our Dunfermline operation, maximising the build quality of refuse collection bodies, and delivering ultimate efficiency for our waste management customers.

Investment throughout 2025 will focus on updating our buildings and manufacturing infrastructure with the latest technologies across the end-to-end operation. Our new, state-of-the-art paint shop will provide the most modern shot blasting painting

methods, along with water-based paints, ensuring the best quality paint finishes for customers, whilst reducing environmental impact.

We're delighted with the market reaction to our latest products across trade and household waste collection, from BIG BITE JUNIOR, POWERTRAK, POWERLINK and CITYTRAK, to the 2025 edition of our MICRO XHD specialist food waste product.

The updated MICRO XHD has a faster bin lift with proportional hydraulics, and the option of a food waste trough. Ergonomically designed controls and the option of a wander lead keep the operator safely out of traffic flow. MICRO XHD is available in either 6m3 capacity and 3T payload, or 8m3 capacity and 5.5T payload and is impressively manoeuvrable for busy UK streets.

# Exhibitors

Our specialist bodies are designed and built for maximum collection efficiency, and the body and hydraulics can be combined with an electric chassis for ultimate fleet decarbonisation.

With 50-years of invaluable industry experience, and a rejuvenating manufacturing investment, we're confident that our products will increase efficiency for customers. We are excited to showcase our latest product range and discuss operational transformation plans.

[www.hillendeng.com](http://www.hillendeng.com)

ISEKI was founded in 1926, based in Japan, priding itself on developing a range of tractors and mowers that is world leading in design and manufacture, from compact to mid-sized.

ISEKI has been represented in Europe for over 50 years and was the first company to introduce compact tractors to the UK market in the mid-seventies. The range of products is distributed and supported by ISEKI UK & Ireland through its network of dealers.

The new TM4270 HST Cab tractor will be showcased at APSE. Supplied as standard with a spacious air-conditioned cabin, the TM4270 is powered by an ISEKI 25hp diesel engine and has a

hydrostatic transmission. Ideally suited to both on and off-road snow clearing duties, it can also be used for grounds maintenance tasks.

Whether you are working in cities, parks, gardens, or campuses the Addax 100% electric MT15, N1 road homologated commercial vehicle, is fully customisable to your specific needs.

From carrying mowers, strimmers, maintenance tools, salt spreaders to collecting leaves, clippings or waste, the Addax is highly adaptable and versatile with the option of a flat bed, tipper, combo tipper or van box bodies to suit the required use, whilst boasting low running costs.

Do you need to cut steep slopes, banks and difficult to access areas? The Raymo remote control electric

mower cuts faster than a strimmer and will solve your health and safety problems keeping the operator away from slopes, noise and emissions. For further details and a demonstration of the ISEKI, ADDAX or Raymo products please contact [www.iseki.co.uk](http://www.iseki.co.uk) Tel.01473 599266

Isuzu Truck (UK) Ltd (ITUK) was formed in 1996 and is a wholly owned subsidiary of Isuzu Motors Ltd Japan, supplying Commercial Vehicles and Aftersales Support Services throughout its Dealer Network in England, Scotland and Wales.

ITUK's range consists of 4x2 rigid chassis cabs at 3.5 tonne, 5.5 tonne, 6.5 tonne, 7.5 tonne, 11 tonne and 13.5 tonne GVW, supplied with a Three-year Unlimited Mileage Warranty and 24/7, 365 Isuzu Assist as standard.

ITUK offers a range of vehicles for municipal operations with a selection of cabs and wheelbases to suit any number of different requirements from refuse and recycling, to parks maintenance and grounds keeping.

ITUK's Customer CARE programme supports every customer proactively throughout the Warranty and Repair & Maintenance contractual period of the vehicle(s) life.

- Customer facing
- Always listening
- Reliable & trustworthy
- Efficient & friendly

The 3.5 tonne range is available in two engine variants, Single or Twin Rear Wheels configurations. Manual, Automatic or Automated Manual Transmission options are available, subject to specification.

The 7.5 tonne range is available with two engine variants, Manual or Automated Manual Transmission options, subject to specification. Relatively small physical footprint allows for tackling the tighter spots.

# Exhibitors

The 11 and 13.5 tonne range, F-Series, comes with comprehensive wheelbase and gearbox options for those Customers requiring increased levels of payload.

The ITUK Dealer Network provides customers with the full range of Sales, Aftersales Services, Support Packages, and Original Equipment Manufacturer (OEM) Parts availability.

We look forward to welcoming you on our stand.

## **CUBBYS** Winter Maintenance Equipment

James A. Cuthbertson Ltd (Cubbys) are based in South Lanarkshire, we are the only Scottish based designer and manufacturer of vehicle mounted winter maintenance equipment and products, specifically, salt spreaders and combined pre wet units. Cubbys produce an extensive range of top-quality snowploughs which are both well respected and a familiar sight on our roads in the winter. Local authorities throughout the UK recognise the benefits of impressively engineered 'Clyde Built'

Cubbys snowploughs, or the open and practical design of the spreader hoppers, conveyors and spinners that allow safe wash down and removal, reducing down time and improving maintenance times.

As well as the winter maintenance equipment range, Cubbys are specialist/bespoke builders of tippers, hot boxes, gully emptiers and sweepers – all these units can form part of our ESB (Easy Swap Body) system that allows one chassis to be multipurpose throughout the year.

As well as manufacturing, Cubbys are agents and stockists for other specialist winter maintenance products including pavement and cycle way spreaders, tractor mounted units and liquid sprayers.

We represent Epoke and SALTNEX from Denmark and VALE from the UK. This allows us to offer a full range and capacity of products to cover all your winter maintenance, highway, pavement and cycleway clearance and de-icing requirements.

So, when the temperature drops and the snow falls remember Cubbys will be there helping everyone clear the ways like we have done for the last 75 years.

With over 22 manufacturing plants and employing over 18,000 people worldwide, you may know JCB

for our market leading construction and agricultural machinery. But did you know that all our machines can also be tailored specifically to meet the challenges and demands of government and municipal applications? Our specialist team of experts is ready and committed to understanding your specific requirements and delivering bespoke solutions that meet your needs today and in the future.

We offer a comprehensive range of innovative machinery and attachments that provide unparalleled performance, efficiency and reliability across all municipal sectors – all supported by one of the largest dealer networks in Europe. From infrastructure development to urban maintenance, JCB's equipment is crucial in delivering efficient, cost-effective results across various government and municipal projects.

JCB is committed to supporting municipalities achieve their sustainable goals. We offer a pioneering range of machines that are 100% electric with zero emissions, without compromise on performance, leading the way to a sustainable future. Whilst the first JCB machines powered by a hydrogen combustion engine were recently out with customers for testing, paving the way for net-zero worksites of the future.

With a global presence and a long history of providing high-quality machinery, JCB continues to play a vital role in enhancing government and municipal operations, driving progress in urban and rural developments, and supporting sustainable

Lothian Vehicle Bodybuilders has received European Whole Vehicle Type Approval from the Vehicle Certification Agency for both N1 and N2 multistage vehicles. VCA Conformity of Production certificates are also in place

We believe that the quality of materials used together with our highly skilled staff ensure that our customers receive a premium product which will stand the test of time. LVB offer a professional, competitive service delivered on time.

If you would like to discuss how we can help your fleet, give us a call on 01506 636909

Premier Pits is the UK's longest-established manufacturer of prefabricated pits, having been a leading name in the sector for over 30 years. They offer a range of inspection, maintenance, ATF, and rail pits, along with accessories and safety products. The company provides a comprehensive service, from consultation to project completion, tailoring solutions to clients' specific needs.

Premier Pits' skilled fitters plan installations to minimise disruption to workshops, maintaining efficient operations. With a global presence across Europe, Africa, Asia, the Americas, and even Antarctica, Premier Pits is recognised for its high-quality products and innovations. Their expertise also extends to under-chassis wash pits and ramps, and they serve as the UK's official supplier

of BrakeMate, which simplifies brake disc replacement by eliminating heavy lifting.

Recently, Premier Pits introduced Thread Saver, a precision-engineered tool for repairing axle threads and wheel studs. Unlike traditional tools that remove material, Thread Saver reforms threads, preserving their strength and load capacity.

Manufactured by Silbertool Solutions in the EU, Thread Saver has been tested by the Material Testing Institute Hannover, demonstrating that repaired threads perform as well as new ones. It boosts workshop efficiency, saving time and costs,

with wheel stud repairs taking as little as 31 seconds. Thread Saver is an essential tool for professionals seeking reliable and efficient thread repair solutions.

Mellor is proud to exhibit at APSE Scotland Fleet, Waste & Grounds 2025, showcasing our innovative, accessible, and low-emission bus solutions designed specifically for Local Authorities. As a leader in British bus manufacturing, Mellor provides flexible transport solutions that connect communities and enhance public services.

Our range of low-floor and accessible buses ensure all passengers, including those with reduced mobility, can travel safely and comfortably.

Designed and built in the UK, Mellor's buses offer outstanding operational efficiency, helping Local Authorities navigate budgetary constraints while maintaining high-quality transport services.

Mellor understands the critical role that accessible transport plays in delivering essential welfare services beyond mainstream networks. From community transport to home-to-school services, our vehicles enable Local Authorities to meet diverse passenger needs with reliability and cost-effectiveness.

At APSE Scotland, our expert team will be on hand to discuss our latest low-emission vehicle innovations, that support sustainability goals. Whether you're looking to enhance existing services or explore new solutions, Mellor buses provide a dependable, future-proof choice for public sector fleets.

Visit our stand to learn more about our comprehensive range and discover how Mellor's

accessible, UK-built buses can support your fleet requirements.

[www.mellorbus.com](http://www.mellorbus.com)

Mercedes-Benz Trucks is trusted by municipalities everywhere to get the job done. From waste collection to heavy-duty tasks, our lineup - featuring the Econic, Arocs, and Unimog - combines smart innovation with rock-solid reliability.

Safety comes first with the Econic and eEconic, both exceeding GSR2 regulations and equipped as standard with Active Brake Assist 6, Sideguard Assist 2, and Front Guard Assist to protect drivers and vulnerable road users. With a choice of conventional or fully electric drivetrains, they deliver smooth, controlled performance in busy urban environments. Recognised for its innovation in safety and sustainability, the eEconic was named 'Innovator of the Year' at the prestigious Fleet Vision International Awards, reinforcing Mercedes-Benz's leadership in waste management solutions.

For demanding municipal tasks, the Arocs is built to tackle the toughest jobs with ease. From construction to winter maintenance, its high-torque engines, reinforced chassis, and intelligent drivetrain technology ensure durability and efficiency in every operation. Advanced safety systems provide additional peace of mind, making the Arocs a dependable choice for challenging environments.

And then there's the Unimog UGE - a true multi-tasker built for year-round versatility. Whether clearing snow or mowing grass, it adapts effortlessly thanks to the new UNI-TOUCH® operating system, which puts intuitive touchscreen and joystick controls at operators' fingertips. This smart interface makes switching attachments seamless, boosting efficiency across a wide range of municipal applications.

Plus, with our nationwide Dealer network, municipalities benefit from Mercedes-Benz genuine parts and authorised maintenance and repair services, ensuring their vehicles stay in peak condition for every job.

Working in partnership, MOBA and Fastview360 offer market-leading bin weighing, telematics and camera safety equipment.

## MOBA

MOBA's sophisticated bin weighing and identification solutions for waste vehicles facilitates the controlled and efficient disposal of industrial and household waste. Together with our logistics and back-office software solutions, councils and waste contractors can gain complete transparency in the waste collection process, enabling them to improve performance and efficiency, as well as the possibility to implement charging schemes.

Our systems are uniquely modular and come with the assurance of more than 200 projects already implemented throughout Europe, with some 7 million managed bins with our MAWIS identification system.

## FASTVIEW360

Fastview360 offers superfast onboard CCTV and telematic services to all modes of transport. It also has the ability to integrate with site CCTV to provide a comprehensive solution to all health and safety issues.

Fastview360 can also assist with the updated Progressive Safe System for DVS, which is

# Exhibitors

enforceable from October 2024, by utilising our AI camera solutions. We are also CLOCS and FORS approved and can help others achieve the accredited status.

Fastview360's hardware is fully compliant with all safety standards and is installed to the highest quality possible by its team of highly-trained, nationwide engineers. Fastview360 can also help with all the latest safety initiatives, such as the updated Progressive Safe System for DVS, which is live and enforceable from October 2024, by utilising their AI camera solutions.

Modul-System is one of the world's leading manufacturers of racking solutions for service vehicles. With decades of experience, we work closely with our customers to ensure our solutions enhance efficiency, improve safety, and maximise vehicle performance. As the demand for electric vehicles continues to grow, we are committed to ensuring that our EV conversions preserve vehicle range, meet operational requirements, and provide long-term reliability.

Modul-System offers a comprehensive range of solutions, including uniquely designed vehicle racking, lightweight floors and linings, electrical solutions, roof systems, advanced electrical components such as e-Power and e-Inverter, and cutting-edge accessories like climate sensors, alarms, and integrated weighing systems. Our innovative Modul-Connect platform transforms fleet management, enabling seamless control over vehicle functions such as lighting, heating, security, and tool tracking via a smartphone app or web portal. Whether you require a fully customised setup or a standard installation, Modul-System provides tailored solutions to meet your needs.

Safety and quality are at the core of everything we do. We continuously invest significant resources into research and development to create innovative, high-quality products that deliver real value to our customers. Our racking solutions are designed to be lightweight yet durable, optimising payload capacity without compromising strength or functionality.

We take pride in delivering high-performance, efficient, and long-lasting solutions to businesses worldwide. Contact our sales team to learn how our systems can enhance your fleet's productivity and efficiency.

We provide impartial and reliable advice on asset finance and vehicle procurement. We pride ourselves on being completely independent of any manufacturer, supplier, finance company or funding method. We regularly assist our clients including local authorities, health boards, housing associations with the leasing of technology, vehicle, plant, equipment and machinery assets and provide advice on the most prudent form of funding for asset acquisitions in line with The Prudential Code.

We manage relationships with a national and international market leading panel of third-party funders and vehicle manufacturers, ensuring that we are able to offer our clients the best possible funding, via compliant procurement frameworks, including the very popular the Halton Housing Fleet Procurement Framework.

The core aim of our service is to:

1. Identify alternative manufacturers capable of supplying vehicles that match our clients' specification requirements.
2. Obtain indicative discounted capital cost figures for those vehicles.

# Exhibitors

3. Appraise the alternative funding options for those assets across a range of retention terms.
4. Provide a summary of conclusions and findings as to the most cost effective method of funding the proposed fleet.

## Our Approach

We prepare reports to assess the key funding options open to clients for forthcoming

replacement vehicles, and will look at the pros, cons and associated costs of outright purchase, non-residual based lease, residual based lease and contract hire.

We review the vehicle specifications with the relevant user department and identify suitable manufacturers.

Using manufacturer discounted capital cost figures, we obtain alternative funding rates for assets from appropriate lessors and contract hire providers. These are compared on a present value basis to internal borrowing and external borrowing.

If leasing is the preferred funding option, we obtain all necessary information to account for the arrangement under IFRS 16 and support the finance function.

Founded in 1903, Nathans Wastesavers is a pioneering force in the UK's circular economy, transforming textile waste into global resources while championing environmental stewardship. As one of the nation's largest textile recyclers, we divert over 500 tonnes of textiles weekly from landfills—equivalent to saving billions of litres of water and reducing carbon emissions linked to fast fashion.

Our dedicated team of over 250 skilled workers ensures materials are meticulously sorted, graded, and repurposed, extending the lifecycle of garments and supporting sustainable consumption worldwide. By exporting recycled textiles to Africa, Asia, and Eastern Europe, we empower global reuse economies and reduce reliance on resource-intensive new production.

Collaborating with charities, local authorities, and waste partners, we drive community-centric solutions to textile waste, while our integration into Textile Recycling International (TRI) since 2018 amplifies our impact—processing over 400 million garments annually to conserve raw materials and curb textile pollution. Every garment rescued

embodies our dual commitment: protecting UK jobs through green innovation and safeguarding the planet by closing the loop on waste. For over a century, our mission has been clear—to redefine waste as a resource and forge a sustainable future, thread by thread.

The ND BROWN LIMITED team are excited to be exhibiting at the APSE Fleet, Waste & Grounds Services Seminar between the 20th and 23rd May 2025 in Aviemore.

N D Brown Limited are a self-drive commercial vehicle hire and hot box specialist with over 40 years' experience. With offices located at Wolverhampton (HO in the West Midlands), Stirling in Scotland, Witheridge in Devon (moving to Taunton Q1), Borough Green in Kent, and Belfast in Northern Ireland as well as 15 mobile service engineers throughout the UK, we are able to service the municipal, civil engineering, utility, highway maintenance, environmental service and Builders Merchant sectors nationally with high quality, well equipped, EURO 6, FORS Silver, DVS PSS and ULEZ compliant specialist rental Tippers (insulated), Tipper Grabs, Asphalt Hot Boxes, Gully Emptyer, Bucher Sweepers, 4x4, Traffic Management, Pole Erection Units, Dropside Crane and Builders

# Exhibitors

Merchant vehicles for short, medium and contract hire commitments.

We currently have a fleet offering of circa. 1200 vehicles, of which nearly half are specialist chassis mounted, tipping trailer and static hot boxes. ND Brown Limited also offer a wide range of specialised new and used commercial vehicles for sale from our Head Office location in Wolverhampton.

Did we mention that ND Brown Limited are also a 'Carbon Neutral' business, a member of the BVRLA and that we now offer CPD accredited Hot Box Training courses, nationally.

Please come and see us for more information or to discuss any requirements that you may have.

We look forward to seeing you.

We strive to bring the best in engineering, delivering lifting and handling solutions that guarantee efficiency, no matter how you define it.

One of our competitive advantages is that we manufacture our equipment at our purpose-built facility in Derbyshire, have a dedicated install team and provide a quality aftercare service.

From fine-cut cylinder mowers to heavy-duty rotaries, to sprayers, aerators and utility vehicles, discover the UK's most comprehensive turfcare machinery offering. There's a Toro mower for every job, no matter how big or small, tough or awkward. Whether you're looking for a highly manoeuvrable zero-turn mower, or a robust, high performance out-front rotary; or perhaps a lightweight, compact triple or large output rotary that cuts long, tall grass down to size, Reesink Turfcare and Toro can help. And thanks to Reesink's strong commitment to customer service and flexible finance options, becoming a Toro user is achievable for any customer.

Since 1898, our history has been written by passionate people who create innovative products in tune with popular culture and made to accompany life. Established in more than 130 countries, the Group employs more than 105,000 people and sold over 2.2 million vehicles and had a turnover of over £52 Billion in 2024. In Europe, Renault Group is consistently present on the podium of car manufacturers.

#### Renault Group Brands

Renault Group comprises four complementary brands - Renault, Dacia, Alpine and Mobilize - offering sustainable and innovative mobility solutions to its customers.

In addition, Renault Group has a stand alone business unit Ampere, the first European company specialising in intelligent electric vehicles.

Working under the Renault brand, it designs, develops, manufactures and markets affordable electric vehicles with cutting-edge technologies.

Ampere combines the expertise and heritage of Renault Group with the agility of a pure player in electric vehicles

Renault Trucks offers a full range of vehicles, with our all-electric E-Tech line-up from 3.1 – 44t and our range of Euro VI, HVO compatible vehicles from 2.8-44t.

Alongside our highly regarded heavy-duty vehicle line-up, our van range now includes the Renault Trucks Trafic and Master, both available as a fully electric option.

# Exhibitors

Our tailored solutions ensure we deliver the best vehicle for your operation, including drive-away options from our 'Ready for Business' range as well as a fully customised solution.

With a network of 72 dealers across the UK and Ireland, Renault Trucks' heavy truck know-how means we operate our business around yours, with out-of-hours servicing, excellent parts availability and a team that will maintain your vehicle to the highest standards, keeping your fleet rolling 24/7.

At Rhino Products, we empower van users worldwide to work safely and efficiently. With a focus on product quality, design innovation, customer service, and sustainability, we set the standard in the commercial vehicle accessory industry.

Our product range is manufactured in the UK and includes internal van racking, roof racks, bars, ladder transportation systems, rear and side steps, pipe carriers, and door ladders, all engineered for durability and performance.

In 2024, we launched the MR4 van racking system, supported by a dedicated production facility designed to deliver industry-leading assembly and dispatch times. Our SafeStow4® ladder transportation system further exemplifies our focus on safety, having undergone extensive crash testing to ensure reliability and longevity.

Our headquarters in Ellesmere Port, alongside our design hub in Deeside, fosters collaboration between engineers and production teams to drive innovation forward. Investments in cutting-edge technology and ISO9001-certified processes across our three UK sites underscore our unwavering commitment to quality.

We are also dedicated to supporting and growing the Scottish economy, partnering with a network of local converters across the region. Our dedicated Sales Manager for Scotland, Kirsten Stewart, further reinforces our continued investment in the north, ensuring tailored support and service for businesses

across the country. As a carbon-neutral company, Rhino Products continuously raise industry standards while reducing our environmental impact, helping businesses across the UK operate more safely, efficiently, and sustainably.

Visit our stand to discover how Rhino Products can elevate your fleet management strategy.

**RIVERSIDE**

Experts in Specialist Fleets

NRG Riverside is the UK's largest municipal and specialist fleet hire company, providing a range of specialist vehicles on both short and long-term hire. They offer flexible maintenance packages utilising their fifteen workshop locations, a range of network partners, and their in-house, twenty strong mobile engineer team. NRG Riverside invests millions in new, compliant and sustainable specialist vehicles each year, and therefore offers a large portfolio of high-quality used vehicles for sale.

Established since 1996, they have supported their customers to rationalise and decarbonise their Fleets, save money and improve efficiency by reducing 'Vehicle Off Road' (VOR) time.

**Roadvert Ltd**

At Roadvert we transform your vehicles into powerful communication tools. Our Spedian™ system is suitable for most vehicles including refuse collection, vans, sweepers or caged.

Changeable, Reusable and Recyclable graphics on your vehicles – quickly and easily changed as your needs evolve.

We've grown to become the market leader in changeable graphics, serving major brands and helping Local Authorities raise revenue and communicate various issues like contamination, food waste, garden waste and service changes. Our Revenue Generation option helps Councils generate revenue by selling advertising space on

# Exhibitors

their vehicles, for more information please contact us.

Our patented Spedian™ frameless system gives a platform for messaging and advertising that can be changed depending on the campaigns required.

The banners can then be stored to be used at a later date and/or replaced by banners reflecting the

current needs of the Council. The Spedian™ system is guaranteed for the useful lifetime of the vehicle, does not cause any damage and is maintenance free.

Our experienced team at Roadvert work with you throughout the whole process and provide unrivalled customer service from initial contact to design and install and we offer continued support to ensure your messaging is always on brand and up to date.

Routeware has been a technology leader in the waste and environmental sector for 25 years and today powers efficient, effective, and profitable operations for over 1500 customers across three continents.

With a mission to transform waste collection to drive a better future for generations to come, Routeware works with smart cities and high-performance haulers to support their digital transformation strategies, enabling them to increase productivity, improve efficiency, engage customers, enhance safety, and drive sustainability.

Routeware's integrated solutions include route optimisation, in-cab, operations, billing & payments, compliance, resident self-service and education, and cameras and video.

In the UK, our software and services have been used by over 200 local authorities and waste & resource management companies to help them improve the

efficiency and performance of their waste collection, street cleansing and environmental services, helping save an estimated £100M+.

Established in 1979, Scarab Sweepers is a global leader in the design and manufacture of cleansing vehicles for municipal, highway and off-highway applications. Our unique range of single and twin-engine vehicles are crafted at our facility in Marden, Kent, in an environment where tradition blends seamlessly with technology, preserving the DNA that has made our quality, refinement and innovation the first choice with customers worldwide.

We offer a wide range of truck-mounted sweeping solutions - with a variety of body sizes, drive types and alternative fuel solutions such as CNG – which all boast excellent build quality, superior performance, optimum payload, and are complemented by minimal noise and exhaust pollution.

In the UK, Scarab also offers the market class-leading sub-compact, compact and maxi-compact sweepers from sister company, RAVO – who provide solutions that include electric and alternative fuel options.

Our customers also benefit from our industry leading After Sales care to ensure their vehicles are maintained to the highest standards, thereby maximising operational performance and minimising unplanned downtime. We also provide operator and technical training courses, along with a range of repair and maintenance packages, to suit individual operators and large fleet customers.

# Exhibitors

## SIMON RICHARD LIMITED

Simon Richard Ltd prides itself on delivering exceptional customer service, offering comprehensive support including technical assistance and parts availability from their base in the Scottish Borders. This commitment is evident in their distribution of machinery being operated in almost all Local Authorities in Scotland, which underscores their role in municipal applications.

The company's strategic partnerships with manufacturers like Muthing, Sauerburger, Reform-Werke, ensure a broad and innovative product offering. As demand for efficient and sustainable ground care solutions grows, Simon Richard Ltd is well-positioned to innovate, and meet evolving customer needs, maintaining its leadership in the sector.

Established in 2009, Solyre has grown to become one of the UK's largest independent tyre suppliers as well as being a member of the NTDA, offering a local & nationwide 24/7 call out service and fleet management and inspections on a regular basis. We're more than just tyres; we're your trusted road partner. At Solyre, we pride ourselves on delivering fast, friendly and expert service tailored to your needs. Whether its advice, repairs or replacement tyres, our team goes the extra mile to keep you safely on the road with confidence and peace of mind.

With local knowledge and access to a full range of manufacturers, our technically trained, local teams are committed to finding the right tyre at the right price.

Our Head Office is centrally located in Airdrie in North Lanarkshire. With branches in Brechin, Dumfries, and Sowerby Bridge, as well as satellite locations in Aberdeen, Dundee, Edinburgh and Cowdenbeath Fife, we have the capacity to cover all tyre needs from West Yorkshire to the North East of Scotland.

We pride ourselves on employing local people and ensuring that our tyre fitters are NTDA / REACT trained and qualified to fit truck, agricultural, car, van, ATV and plant & earthmover tyres.

If you operate a fleet of vehicles, Solyre can offer a proactive maintenance programme to manage your fleet of vehicles efficiently and safely, and will perform regular detailed inspections to maximise the life of your tyres, reduce unnecessary breakdowns and maintain their operational efficiency and safety standards.

We are the largest Global Van Conversion company and service provider across Europe. Our customers value the reduction to their TCO – (total cost of ownership) of products and services bring them throughout the lifecycle.

Using 'Sortimo's Eco-system' of the largest range of boxes and complimentary products we specialise in optimising the operator's productivity from curb-side to job-site; Our consultative approach will help our customers to reduce their TCM.

We help our customers to not only increase their productivity but to achieve their CSR targets by reducing the carbon output, work-place accidents and creating a safer more inclusive working environment.

For current Sortimo customers we have:

- Simplified and standardized a fleet of 70 variants to 6
- Increased first fix rates from 87% up to 95% - eliminating 8% of the costly 'second visit'
- Reduced running costs by down-sizing an international customer with circa 500 vans from a fleet of large vans to now run medium vans.

The industries drive towards electrification means Sortimo are strategically placed with multiple product ranges which use a diverse range of raw materials to ensure that weight reduction is a key fundamental of our systems. We ensure our

# Exhibitors

products are designed with EV-range in mind ensuring complete flexibility for our users. Sortimo will help make your fleet safer, maximise efficiency and decrease your carbon footprint!

South Cave Tractors Ltd (SCT) has been at the forefront of Mercedes Benz Unimog sales in the UK for more than 50 years and it's our focus on after-sales service, internal training, and technical expertise that has delivered us to the top of the Unimog tree in terms of overall sales and customer support.

There are many areas where you might find the multi-purpose Unimog in the Municipal sector. Municipal and Highways operations cover a wide variety of different roles and many among them demand Unimog's stock-in-trade: Unimog drives itself to the work site quickly and efficiently, carrying all of its own tools and implements, possibly towing another trailer behind it with additional highways kit.

Clean and powerful Euro 6 engines deliver incredible reliability, fuel economy and 1400 hours between services. The mounting points and multiple drives systems mean that triple mowing decks can be used in one efficient pass. When Unimog is used around-the-clock and around-the year in a variety of highways roles, it can deliver a level of productivity that few machines can match.

Safety is one of the key requirements of modern highways operations and here, too, Unimog delivers: ABS disc brakes, short overhangs and a very large glass area for maximum visibility. Unimogs rigid ladder chassis, high-backed air suspended seat and 3 point safety belt protects its driver from a potential rear impact while working on the hard-shoulder, unlike a traditional tractor where the driver sits at the rear of the vehicle.

Come see us on our stand and see what South Cave Tractors and Unimog can do for your organisation.

Stertil-Koni is the industry-leading manufacturer of top-of-the-range 2-post, 4-post, In-ground, Skylift,

Mobile Column Lifts, and Washbay Vehicle Lifts. With our commitment to quality and innovation, we're proud to be the World's No. 1 commercial vehicle lift specialist.

Our comprehensive range caters to all workshop and washbay lifting needs. Operating hydraulically, our lifts offer an exceptional price-to-performance ratio while meeting or exceeding the world's highest safety standards.

All Stertil lifts are installed, commissioned, and maintained by our own Garage Equipment Association (GEA) accredited and factory-trained engineers, ensuring that every lift operates with maximum reliability and safety.

As a long-standing supporter and sponsor of APSE, Stertil-Koni is trusted by numerous UK councils and public sector organisations. Our Mobile Column Lifts and Skylift Washbay vehicle lifts are among our most popular products, chosen for their quality and durability. Additionally, our Earthlift mobile columns feature a patented active energy retrieval system, making them 35% more energy efficient and helping to minimise downtime. Whether you need replacement lifts, workshop upgrades, new garage facilities, or a washbay installation, Stertil-Koni is your trusted partner. With an extensive product range and decades of expertise, we provide cutting-edge solutions to support the safe and efficient lifting of commercial vehicles.

Stock Sweepers, founded in 1998, proudly stands as the world's sole British-owned and operated road sweeper manufacturer. Our family business was originally created to recondition and remount used road sweeping equipment onto new chassis, for our own operated hire fleet. After 10 years of dismantling and rebuilding worn sweeping equipment, we gained invaluable insights into road sweepers. In 2009, we launched two new robust sweepers: the S6400 and S8400, which are still in operation today alongside our latest QuadVac model.

We pride ourselves on building the highest quality machines available on the market. Our mission will never be to build the most road sweepers, but to

# Exhibitors

build the most robust sweeper possible. We create durable and high-end machines that provide a premium service for our customers. The mild and stainless-steel components we use are thicker than the road sweeper industry standard to ensure the longest lifespan achievable. Each piece of equipment undergoes precision fabrication, followed by a powder-priming and coating process, resulting in an exceptionally durable and high-quality finish. We know that our sweepers must be robust, and the subframe and tipping hinges are vital to the vehicle's stability. We utilise double the standard steel to offer optimal stability on rough terrain.

Our machines are now available across North America, Asia, Australia, and Europe. Though we are growing, we still work closely with our customers, with regular communication and attention paid to their needs. Our commitment to extra strength, durability, and a personalised approach is what really sets Stock Sweepers apart in the industry.

Storm Environmental, UK based major manufacturer of steel-bodied 4-wheeled waste and recycling containers for use with comb and din lifting equipment.

We offer a full range of 1280, 1100, 770, 660 and 500 litre containers. Our 1280 litre container fitted with a reverse lid and auto lock will be available to see on our stand.

Storm's brand-new Food POD litre food waste container will also be available to see on our stand. Specifically designed for food waste collection. The POD is manufactured in Britain from 2mm thick galvanized steel. Giving long service life allied to fire and vandal resistance.

The sleek and aesthetically pleasing design will fit perfectly into any surroundings and encourage the community to make food waste disposal part of their everyday activity.

The POD allows quick and easy access for a standard 240 litre two wheeled bin to be stored with

the convenience of interchanging with a 180 litre or even a 140litre bin if required.

The POD (Place Of Disposal) can be fitted with a foot or manually operated, soft close lid and stainless-steel grab handles for ease of operation and the emptying of food waste into the unit. The emptying aperture has been designed for kitchen caddies or food waste bags to be disposed of easily and hygienically.

Along with the smooth galvanized steel body, the POD is powder coated outside in any RAL colour required by the customer, then customised with graphics and branding to suit.

TBC Conversions is one of the market leading conversion companies operating across the UK, specialising in wheelchair accessible vehicles and minibus conversions. Established in 2006, the company has secured a reputation for quality and reliability, converting each vehicle with intelligence, empathy and care.

TBC Conversions is certified on the MAN Partner Program and are also certified as an Integrated Partner by Volkswagen Commercial Vehicles. Both demonstrate our outstanding technical expertise and experience in the conversion of Commercial Vehicles. We are Approved Vehicle Convertors for Mercedes, Renault, Vauxhall, Citroen, Peugeot, Ford and Fiat.

TBC Conversions is included on Lot 7 of the CCS RM6244 – Purchase of Standard and Specialist Vehicles Framework.

The company has a strong customer base including Local Authorities, Community Transport Operators, Commercial Vehicle Dealerships, Health & Social Care Trusts, Fire & Rescue Services and Utility Companies. This expansive customer base is established and maintained through our commitment to our customers from point of order to vehicle delivery and our high standard of after- sales care.

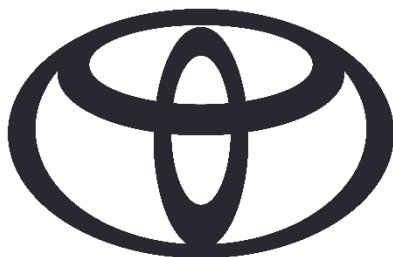

# Exhibitors

TBC Conversions stock a range of base vans for conversion, something which continues to be of particular interest in the ongoing climate of longer lead times for vehicle supply. They offer a full 3-year comprehensive warranty on all minibus conversions with the option to extend to a 5-year warranty.

On display, at this year's event will be a small wheelchair accessible vehicle (WAV), a 17-seat wheelchair accessible minibus and a 9 seat fully electric wheelchair accessible minibus. For more information or a brochure, please visit the TBC Conversions stand at this event; the team will be happy to answer any questions you might have.
