

The importance of access to green infrastructure for people and places

Clare Warburton, Principal Adviser, Natural England

www.gov.uk/natural-england

A photograph of an urban street scene. In the foreground, there is a large, dense patch of tall, green grasses and purple flowers. In the background, there are brick buildings, a modern glass-fronted building, and a blue bus. A signpost with various traffic signs is visible. The text "How can access to green infrastructure transform our towns and support levelling up?" is overlaid in white with a black outline.

How can access to green infrastructure transform our towns and support levelling up?

Green Infrastructure

“Green infrastructure: A network of multi-functional green and blue spaces and other natural features, urban and rural, which is capable of delivering a wide range of environmental, economic, health and wellbeing benefits for nature, climate, local and wider communities and prosperity”.
National Planning Policy Framework 2021

Why GI?

Nature rich beautiful places

Active and **healthy** people and places

Thriving and prosperous **communities**

Resilient places that are good for the **climate**

Improved **water** management

Healthier,
more resilient
nature

Getting the balance...

Have we got enough green space in the right places to help level up access to nature?

Is there good quality green space close to where people live and work?

What are the barriers to people using green space and how can these be addressed so that everyone can access green space?

NATURAL ENGLAND

During the pandemic- Nature and getting outdoors important for wellbeing & happiness

“Thinking about life since the coronavirus restrictions began, have you noticed or done any of the following?”

People and Nature Survey: Monthly COVID-19 Indicators Apr 2020 – Mar 2021

Visiting local green and natural spaces has been even more important to my wellbeing.	43%
Nature/wildlife is more important than ever to my wellbeing.	39%
I have spent less quality time outside with family and friends.	35%
I am visiting local green and natural spaces more.	34%

n = 22,911

82% adults agreed that 'Being in nature makes me happy'

n = 23,314

Most people's experience of the natural world is on their doorstep

41%

A group of about ten people, including children and adults, are gathered around a small pond in a residential area. They are engaged in a community activity, possibly a water quality test or a pond cleanup. Some are kneeling or sitting on the grass, while others are standing and using tools like nets and scoops. In the background, there are brick residential buildings, one of which is a two-story structure with a water tower on its roof. The sky is overcast.

More quality green space can be provided for underserved communities

What are we doing?

Natural England is working closely with partners to tackle barriers to nature in areas where it is most needed:

- Environment Act: Local Nature Recovery Strategies and Biodiversity Net Gain.
- Green Infrastructure Framework to help to bring nature to the doorstep.
- Landscapes Review: New landscape approaches in towns and cities
- Scaling up Green Social Prescribing

Environment Act 2021

Local Nature Recovery Strategies

- Locally developed, spatial strategies for nature working within a national framework.
- Identify opportunities and priorities for enhancing the natural environment
- Inform and underpin the national Nature Recovery Network (NRN)
- Draw on other relevant spatial plans and strategies such as GI strategies.
- Can be used to target net gain delivery

Biodiversity Net Gain for Parks & Green Spaces

- Long-term (30+ years) financing
- Investment from local developments
- Scope to combine with other finance
- Existing and/or new parks & green/blue spaces
- Ensure **Local Nature Recovery Strategies (LNRS)** make reference to parks and green/blue spaces
- Gain familiarity with the **biodiversity metric 3 and baseline**

Green Infrastructure Framework

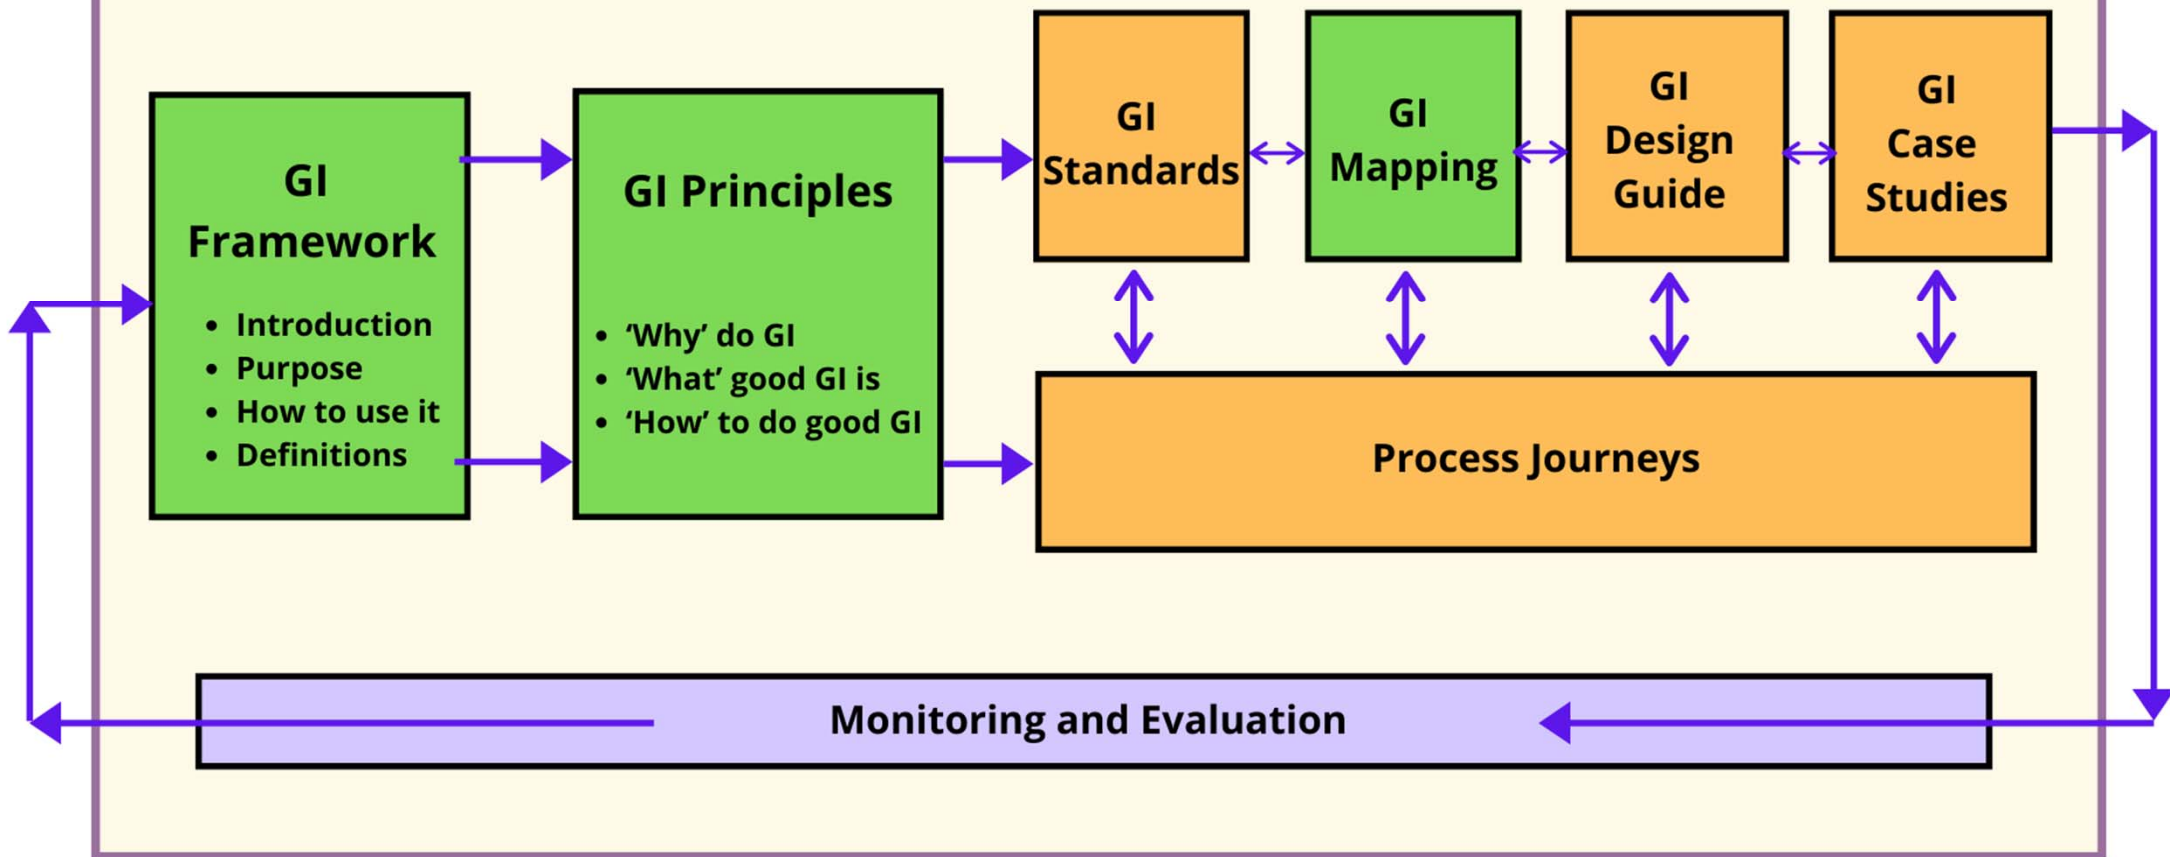

<https://designatedsites.naturalengland.org.uk/GreenInfrastructure/home.aspx>

- Improve existing green infrastructure (GI) and create more GI to provide benefits for health, nature, climate and prosperity
- Help the country recover from Covid 19 by ensuring that everyone has access to good quality GI and by focusing on areas of poor GI provision especially in areas of multiple deprivation and health inequalities
- Support Local Authorities in refresh of local plans by 2023
- Mainstream GI as a key asset/ infrastructure in creating and maintaining sustainable places

Green Infrastructure Framework - Principles and Standards for England

Principles - The Golden Thread

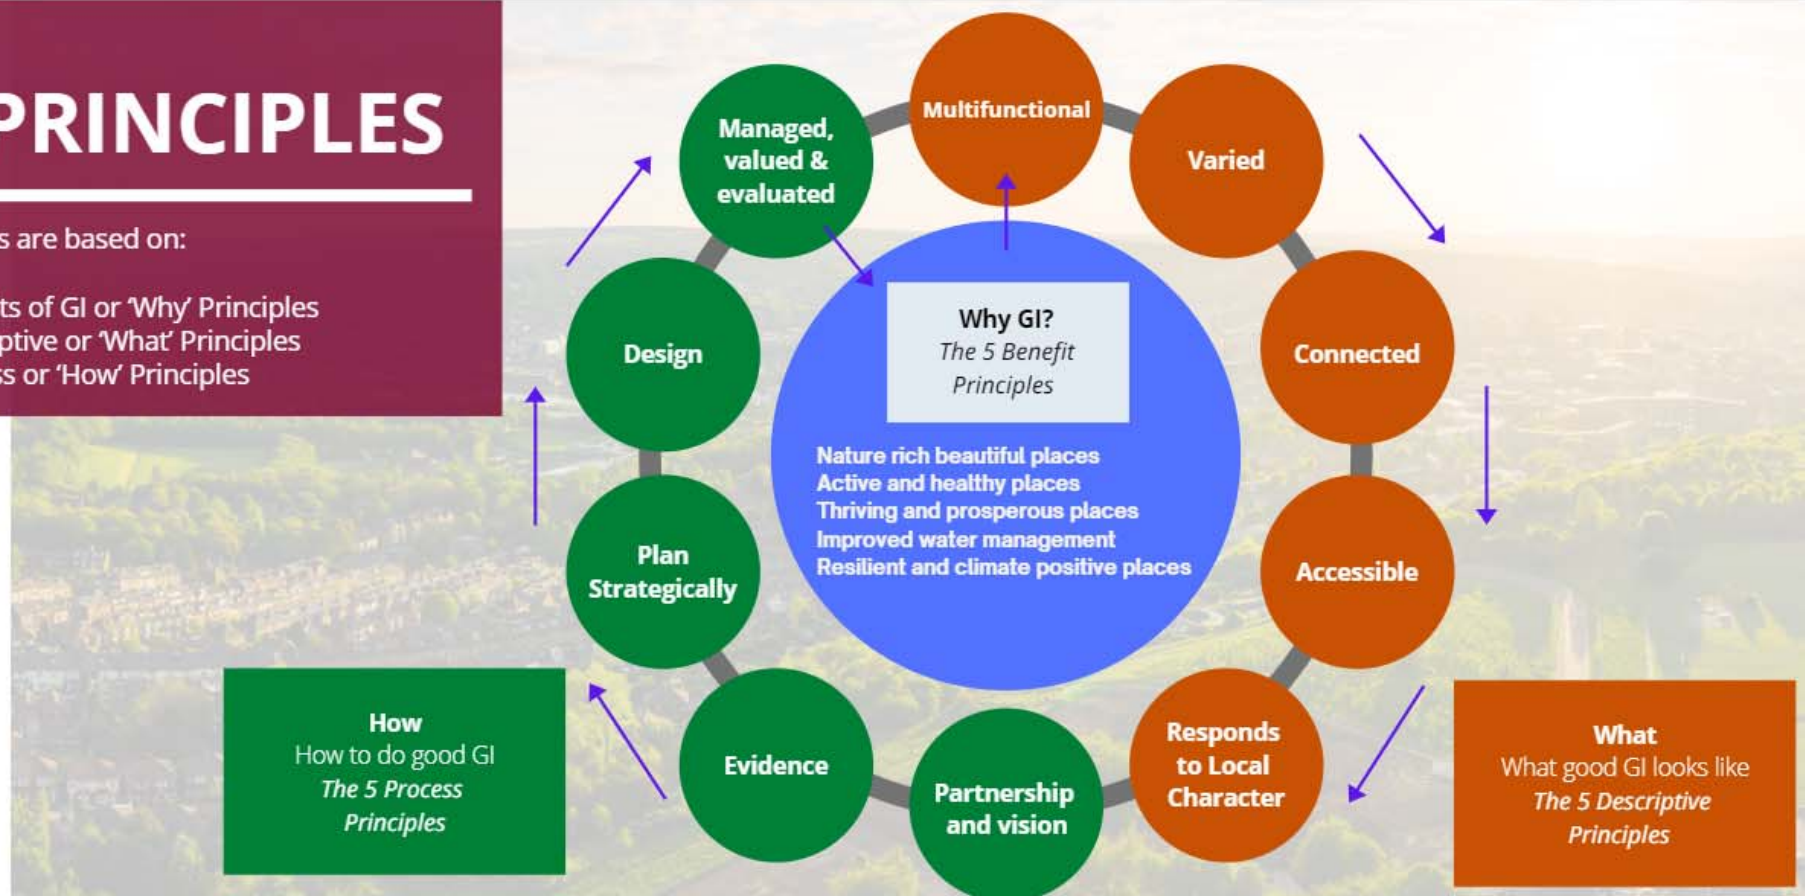

Green Infrastructure Principles

THE PRINCIPLES

The 15 Principles are based on:

- The 5 Benefits of GI or 'Why' Principles
- The 5 Descriptive or 'What' Principles
- The 5 Process or 'How' Principles

Accessible Natural Greenspace Standards

(Draft Updated)

Name of criterion	Size distance criteria	Walking & Cycling Times
Doorstep Greenspace	At least 0.5 ha within 200 metres	Under 5 mins walk
Local Natural Greenspace	At least 2 ha within 300 m (straight line route) or 500 m (actual route)	5- 10 mins walk 2 mins cycle
Neighbourhood Natural Greenspace	10 ha within 1 km	15 mins walk (4 mins cycle)
Wider neighbourhood	At least 20ha within 2km	35 mins walk
District	100 ha within 5 km	20 mins cycle
Sub-regional	500 ha within 10 km	40 mins cycle
Local Nature Reserves	At least 1 ha per 1000 population

What can be done locally?

- Incorporate GI into Local Nature Recovery Strategies
- Biodiversity Net Gain baselines
- Use the GI Mapping Database to identify inequalities in access to nature
- Adopt the GI Principles as part of GI Strategies and GI local plan policies
- Apply the GI Standards (from Dec 2022)

Next steps

- Further development and testing of Core GI Standards
- Launch of GI Framework in Autumn 2022
- Consultation on GI Framework – post-launch - refinement
- Rollout 2022 onwards
 - Collaborative approach
 - Training
