Seminar Objectives & Booking Information

About the Seminar

Local Authority Fleet operations are the essential element in ensuring the continued delivery of front-line council services. To ensure well run in-house fleet and maintenance services stay ahead of the game, this seminar brings together the elements that influence future success.

Speakers will cover the national picture, the regulatory context, human, financial and legal issues and strategies for maintaining efficient operations. The seminar will also look at innovation, the transition to cleaner fuels, recruitment, self-regulation and ensuring continued efficient delivery of fleet services.

The industry is faced with some huge challenges. A substantial skills shortage with an aging workforce has meant it's increasingly difficult to recruit new staff and retain existing. The race to net-zero which will fundamentally change the nature of the vehicles and equipment and the management challenges are multiplied. The job of today's transport manager is more complex than ever.
